1 Getting Started

1.1 Welcome to Apparound

WELCOME, APPAROUND, ABOUT

Applies to: Mobile, Web

Apparound is your customer facing mobile and web app to digitise sales and promote your product or service.
Apparound will help you to more quickly manage all of your latest company materials and tools allowing you to conclude an errorless presales and sale process. The app will give you all you need to conclude a perfect sale in accordance with all of your company quoting rules.
You will be able to easily create complex quotes, improving order quality and cutting down sales cycle time. You can browse catalogues, interactive brochures, news and propose them to your customer. In this way, your customers will be engaged with you in a seamless buying experience without obstacles and distractions.
While using Apparound you will be able to share contacts and contents with your customers letting them discover your company and your solutions in interactive way.

1.2 First Access

LOGIN, OFFLINE WORK, STORE

Applies to: Mobile, Web

You can access Apparound in different ways:

- As a downloadable app from the main stores such as iTunes, Google Play, or Windows.
- As a web application (called Webclient) in the main browsers. This option doesn't require anything to be installed.

Go to the store of your choice and download the app. Then tap on it to launch.

Depending on your company policy, you have received, or are about to receive, your activation email containing your credentials for your first access. Remember that the password that wiill be sent to you is a temporary password and you will be able to use it only during your first access. In your first access the system will ask you to change it.
Change your temporary password by following some simple steps.
Depending on your company security policies you will be able to select the "Keep me signed in" option or reset your password easily, in case you've forgotten it.
This guide covers all of the flavors of Apparound and it assumes that you are using the default, out-of-the-box configuration of the solution. If your solution is missing an option that looks useful, ask your admin if the feature has been disabled.
To be able to access all available content in offline mode, it is important, on your first access to download it.
If you are on mobile it is important that on your first access your device is connected. A wi-fi connection is recommended, in order to avoid extra costs of your data connection.

5.1 Save content offline.

2 Requirements for using Apparound

2.1 Minimal requirements

DEVICE, OS, DISPLAY, RESOLUTION, STORAGE, REQUIREMENTS, BROWSER

Applies to: Web, Mobile

Before getting started with Apparound, make sure that your devices meet the following requirements.

Apparound is supported on a variety of mobile platforms, and with most major web browsers, resolutions, operating systems, storage, ram and mobile browser requirements.

Web Browser	Version
Internet Explorer	11
Mozilla Firefox	Last version
Chrome	Last version
Safari	Last version
Microsoft Edge	Last version
Display	Minimal Requirement
Minimal	1000px width
Suggested	Resolution 1024x768
Mobile OS	Minimal Requirement
iOS	9.2 up to 10
Android	5 up to 6.0
Windows	Pro x86 10
Storage	Minimal Requirement
iOS	200 Mb
Android	200 Mb
Windows	200 Mb
RAM	Minimal Requirement
iOS	1 Gb
Android	1,5 Gb
Windows 10	4 Gb

Device	Sample
iOS	IPad Pro, iPad 4, iPad Air 1-2, iPad Mini 2-3 Retina, iPhone 5, 5S, 5C, 6, 6Plus, 6S, 6S Plus, 7
Android	Samsung Galaxy Note 2014, Nexus 9, Galaxy Tab A (as exception due to the 1024x768 display resolution or similar), Samsung Galaxy S5, Nexux 5, similar
Windows	Microsoft Surface 3 Pro, similar

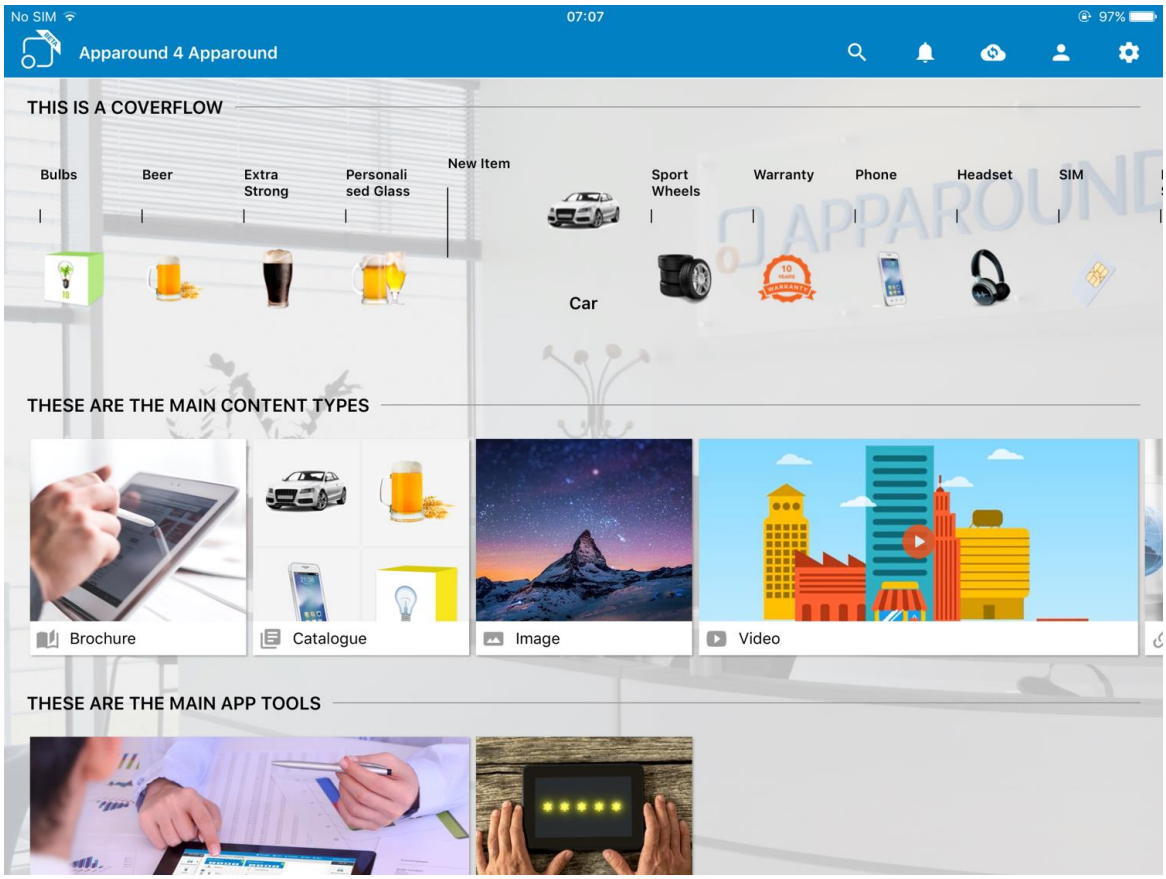
3 Apparound Basics

3.1 Getting Around Apparound

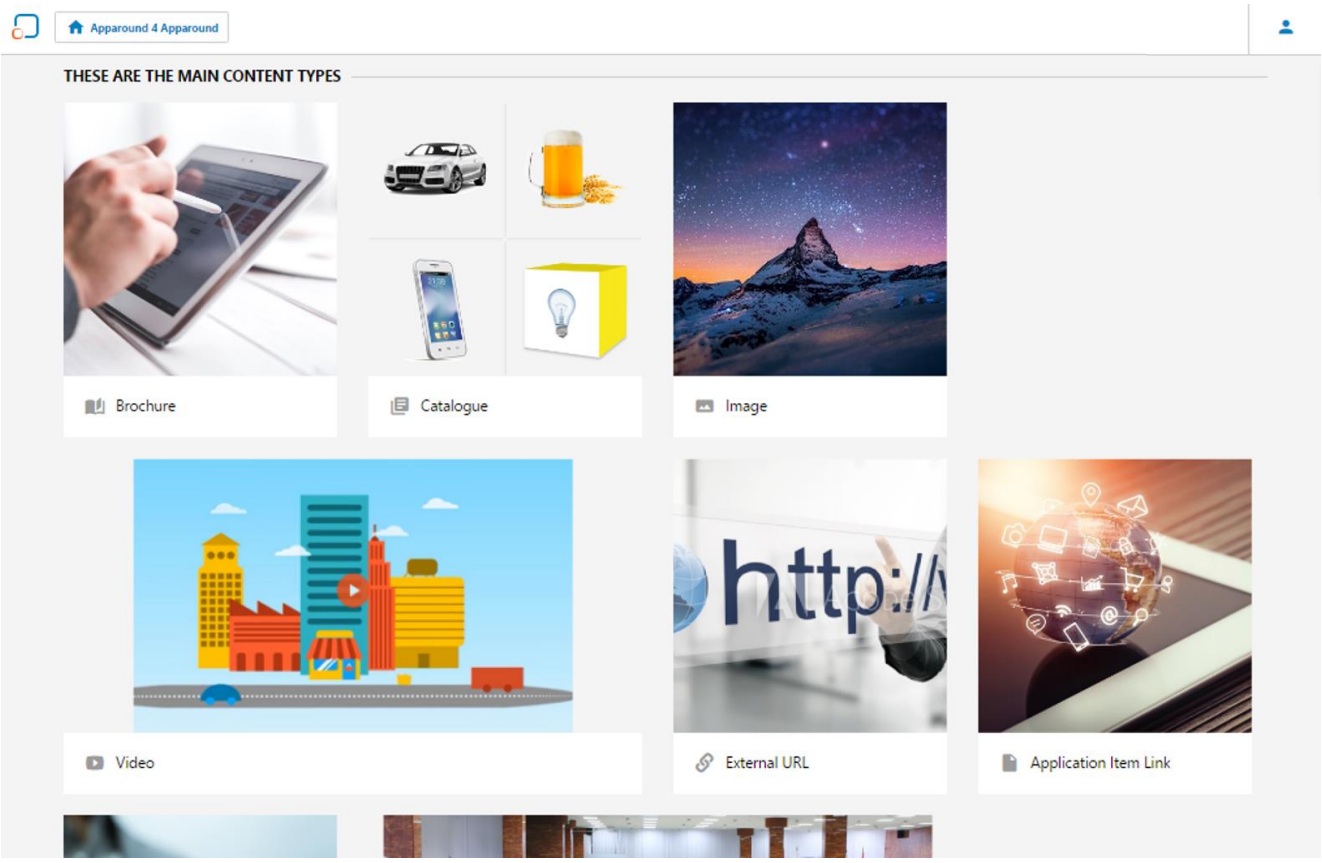
ABOUT, APPAROUND

Applies to: Mobile, Web

Here you will find everything you need to start using Apparound efficiently.
After login you will land on the Home page of the app, the main section in which you will find your profile settings, all contextual actions and all contents and tools made availables for you.



Apparound Home on Mobile



Apparound Home on Webclient

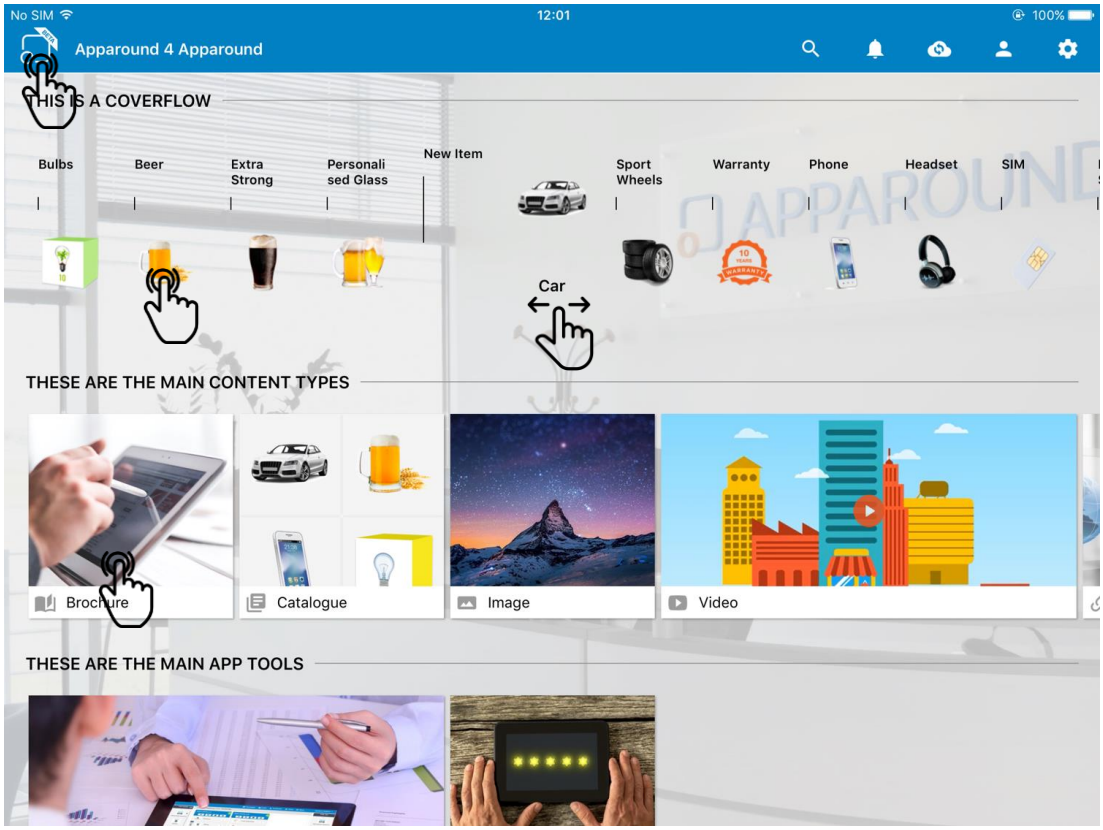
Apparound Home on Smartphone

3.2 Show and Share latest sales material

SHARE, CONTENT, MATERIALS, MARKETING, SALES

Applies to: Mobile, Web

Here you'll find all content and tools published for you.
Show the latest ones to your customer and be sure to propose the best solution at the most opportune moments.
Access materials in one tap from the Home page and if the content has the correct setting, share it with your customer.
Showing and browsing content you can always go back to the home page by tapping your company's logo at the left of the toolbar.



Apparound Home on Mobile

The synchronisation of all materials will begin when your device is online.
Read the section in the Technical Stuff paragraph.

SEE ALSO:

4.6 Working with Catalogues.

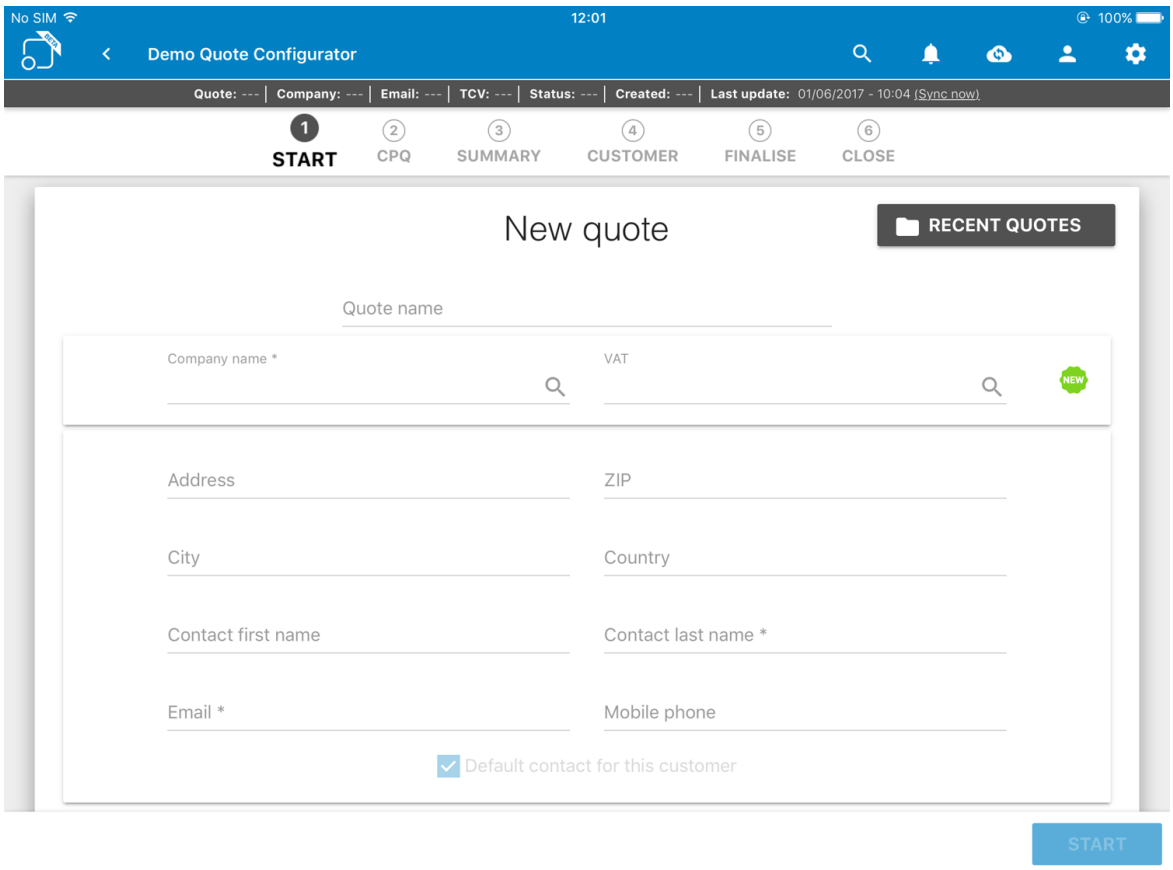
3.3 Easily create a new, perfect quote

QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO

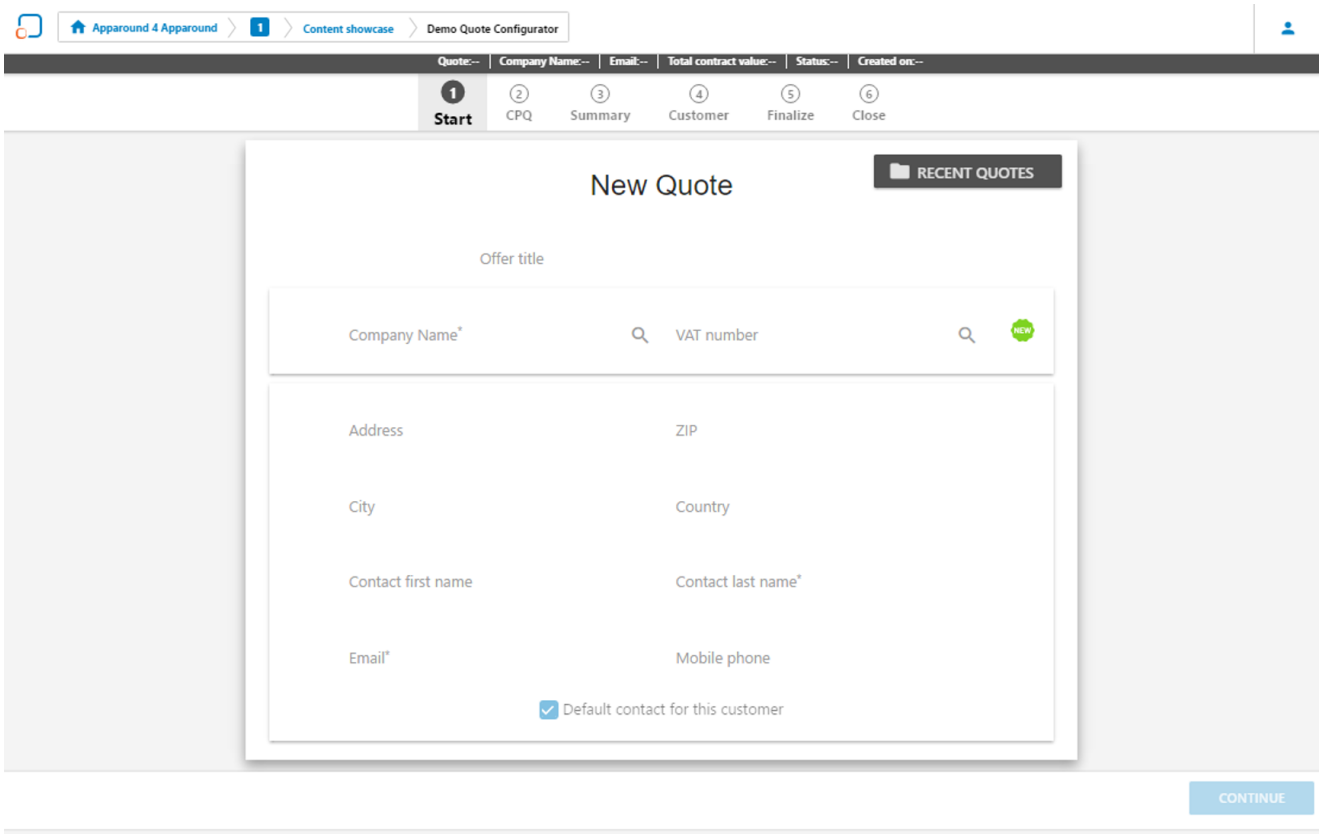
Applies to: Mobile, Web

Apparound is a customer facing mobile and web app: you will be able to compose complex offers with your customer.

Start tapping on the Quoting tool and you'll land on the first step of the sales journey (You can find the quoting tool on your home page or in a folder).



Start page of Quoting Tool, new quote on Mobile



Start page of Quoting Tool, new quote on Webclient

If you are starting a new quote, you will have to collect your customer data to begin creating a quote by following the suggested sales journey.

After filling out all of the mandatory fields, the **START** button will be enabled. Tap on it to proceed to the second step.

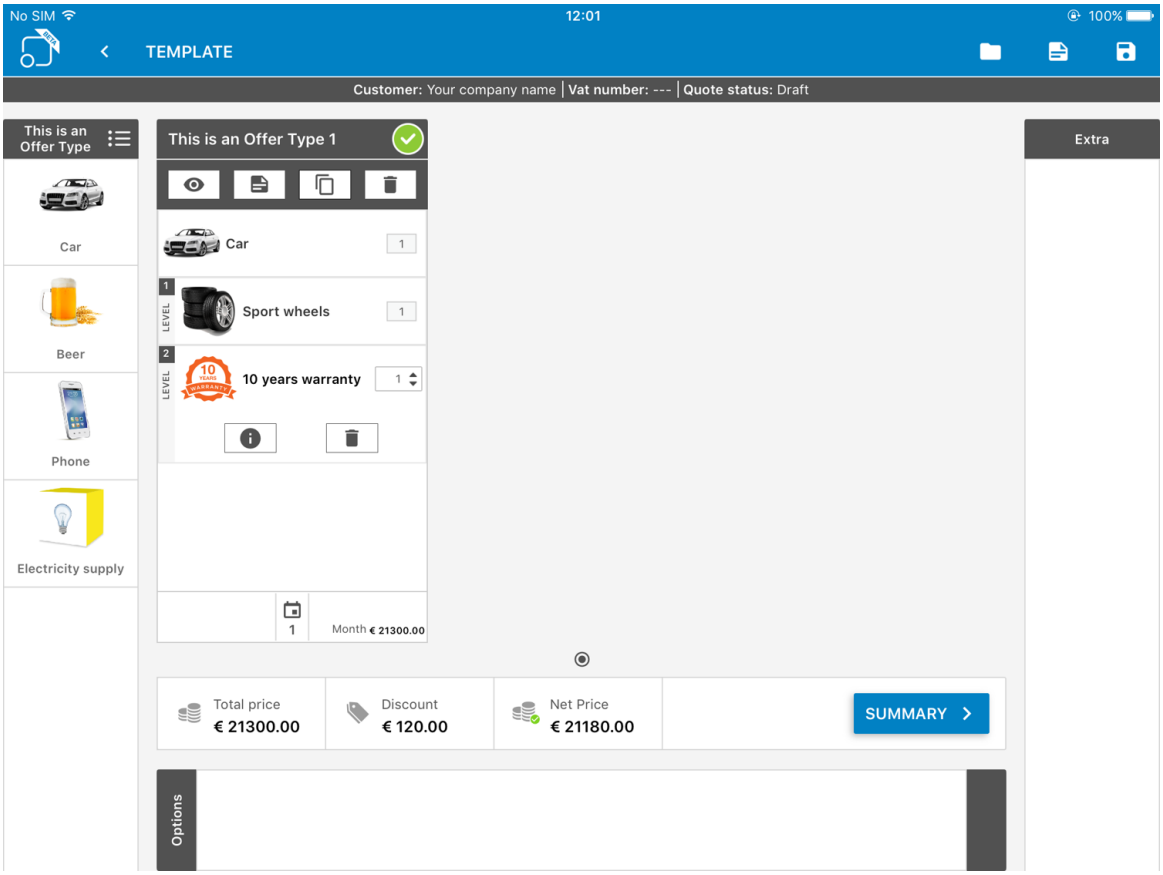
Attention! The system may do a check on the validity of certain fields, like "Email" and, in the case of invalidity, may not validate the field and not enable the "Start" button.

3.4 Quoting Tool

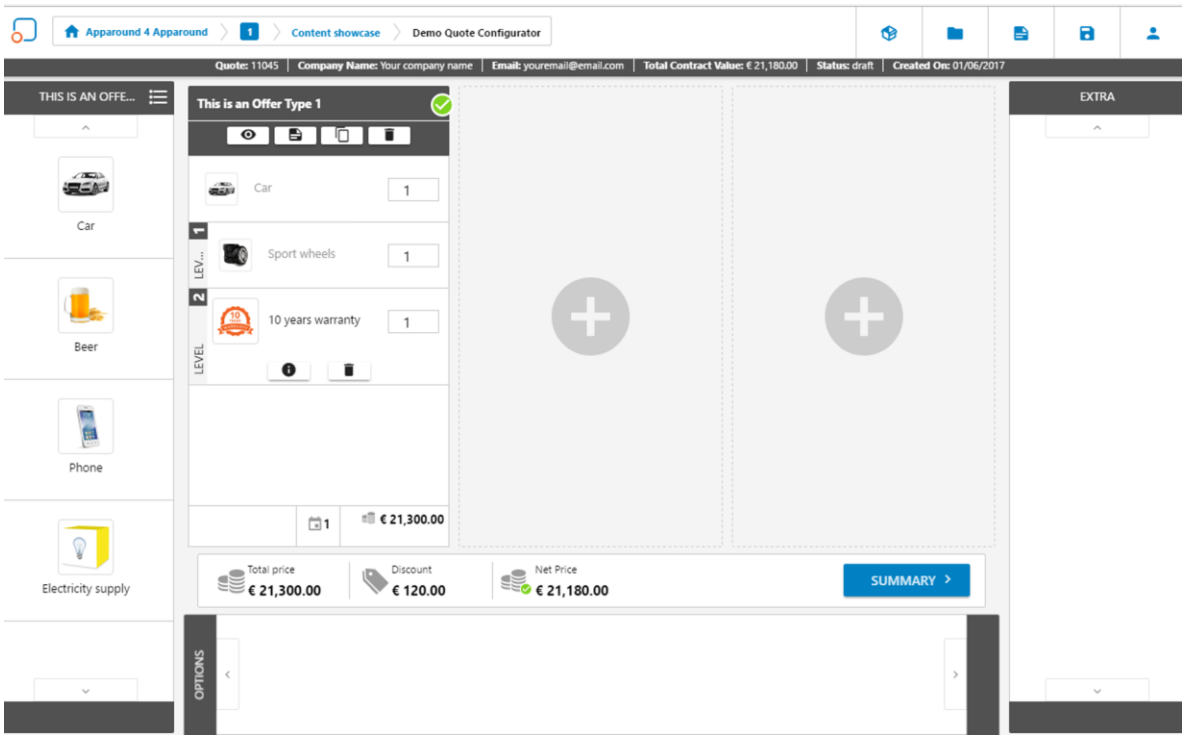
QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO

Applies to: Mobile, Web

After customer data collection you will be redirected to the configurator page: here you will be able to configure the quote for your customer, by creating real carts containing your products or services.



Quoting Tool, create a quote page on Mobile

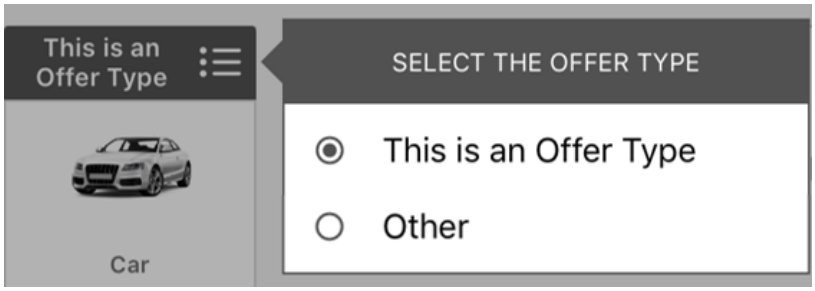


Quoting Tool, create a quote page on Webclient

On the Quoting tool page you will find the toolbar, which will be enriched with some extra functionalities:

- "open a quote" button , this will allow you to open a quote saved in draft status;
- "add a note" button , this will allow you to add a note to the entire quote;
- "save" button , this will allow you to save and rename the quote, to open it in another moment.

The default structure of the tool will display three main axes. On the left you will find all of the Offer Types and all of the starting products, on the other axis you will find all other products.
To begin, you should select an Offer Type.

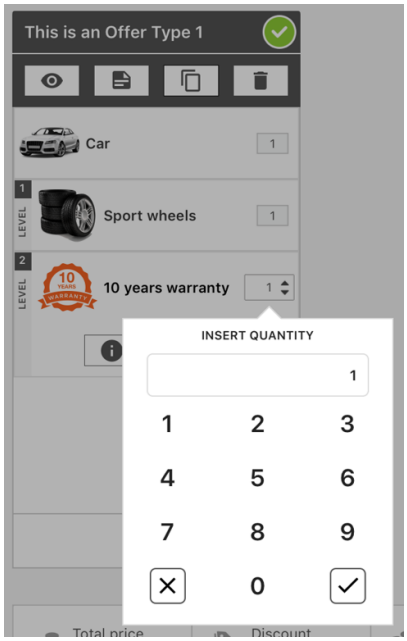


Offer Type

The Offer Type is the context in which the quotes are created. It's composed by a set of products and category of products organized in a specific business relation. In the Quoting Tool, you can find more than one offer type. After selecting an Offer Type you can start to fill your cart by selecting a starting product. You will find all starting products on the left axis. After the selection of the starting product you will be able to select products linked to it on the other axis and proceed with the composition of the offer.
On the left you will find all the starting products, on the other axis you will find others products, organized according to your sales and marketing rules.
Apparound will allow you to create quotes in line with all company business rules without any errors. All business rules will be automatically applied.
In some case, you might receive feedback or recommendations by the app.
When you select a starting product a new cart will be created and all compatible products will be displayed on the other axis. You will be able to add these products to your cart.

For each product you will be able to select the following actions:

- View technical details or images by tapping on the button under the product in the cart;
- In accordance to the business rules, you will be able to edit the quantities.



Edit quantity

Attention! Manually editing the quantity may be corrected by the system in accordance to the business rules and this could impact the quantity of other related products.

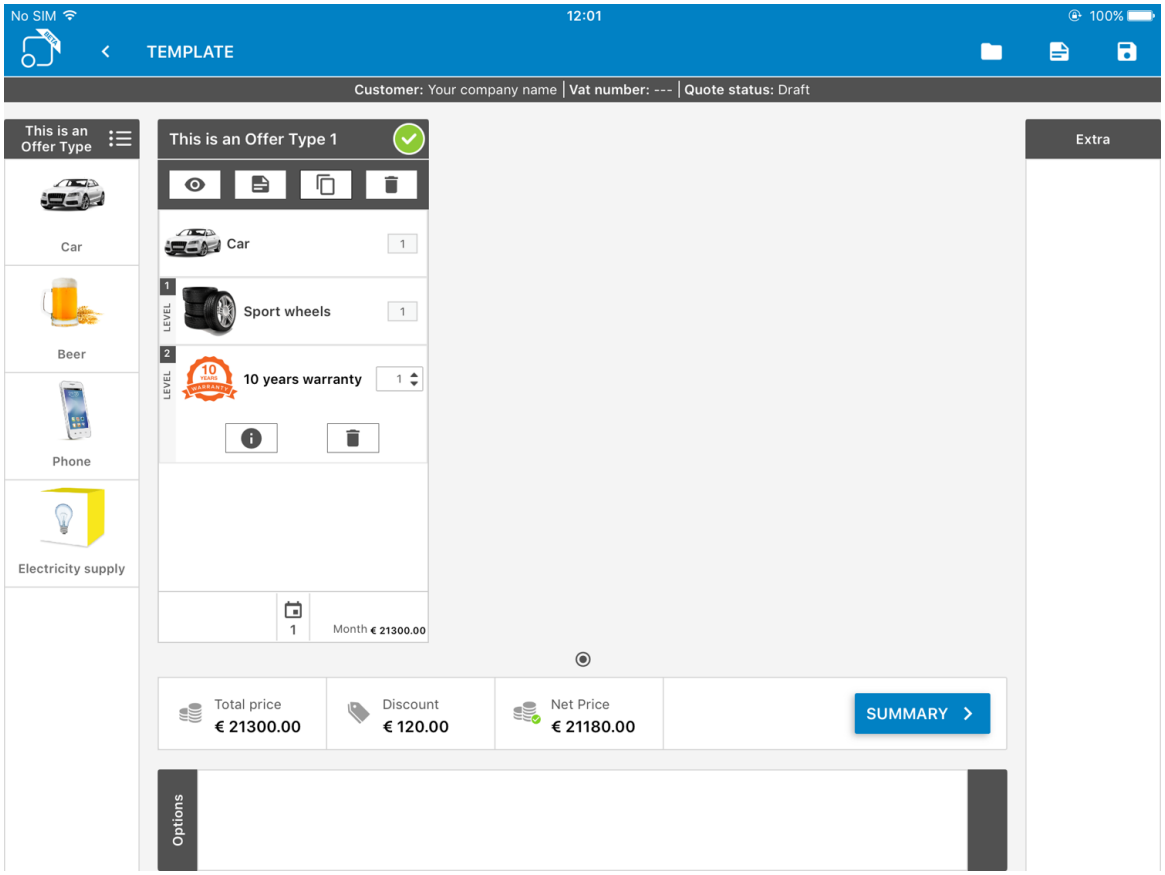
- Delete the product by tapping on the button.

For each cart you will be able to make some actions :

- View the summary of the cart by tapping on the button at the top of the cart;
- Add a note by tapping the button;
- Clone the cart by tapping on the button;
- Delete the cart by tapping on the button.

You will be able to add bundles and products to your carts with standard promotions. You will add packages containing a set of products. You will find all packages on the top of the Configurator. Bundles and other promotions, instead, will be load automatically when you select an eligible product.

Each cart will be calclulated in real time giving you feedback messages in case of invalidation.



Quoting Tool, valid cart on Mobile

When you finish the configuration, you will be able to proceed, by tapping on the SUMMARY button.

A distinctive trait of Apparound is the possibility to create a quote in offline mode too.

For more detail about the creation of the quote in offline mode read the Work Offline paragraph in "Apparound Advanced" section.

3.5 Make Comparisons

QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO, COMPARE

Applies to: Mobile, Web

Sometimes it might be useful to create a copy of a cart or of a quote to make some changes and show the customer all possible variations.
You will be able to make this comparisons in two different ways:

- by cloning a cart using its specific button. In this case the individual cart and all the products inside will be cloned.
- By clicking on the CREATE A COPY button at the end of a finalised quote. In this case the entire quote will be cloned.

3.6 Review Quote

QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO, SUMMARY

Applies to: Mobile, Web

After tapping on the SUMMARY button you will land on the next step of the sales journey: the Summary. Here you will find a complete review of all products and/or services in the quote, the totals of each cart, and the total of all offers, promotions applied, notes and all payment details. From this page you will be able to back to the Quoting Tool page by tapping on the BACK button or going to the next step of the journey by tapping on the NEXT button.

3.7 Review Customer Data

QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO, CUSTOMER

Applies to: Mobile, Web

Tapping the NEXT button you will be taken to the Customer step. Here you will be able to edit the fields filled out at the start of the quote. To go back to a previous step, the Summary, you have to tap on the BACK button.

To proceed to the next step you have to tap the NEXT button.

SEE ALSO:

4.10 Track your quotes and your customers.

3.8 Send Draft Quote

QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, DRAFT

Applies to: Mobile, Web

You are now in the Finalise step of your sales journey. Here you will be able to SEND EMAIL containing the PDF of the quote created to your customer. The Draft status will be visible by a watermark on the Pdf. The PDF will contain the summary of your quote and all available details attached to every product in it (i.e.: images or technical sheets).

If you are in offline mode the email will be queued and sent only when your device is back online.

In the PDF of the quote sent to your customer a summary of all products, carts, promo and discounts applied to the quote and technical details or images of products will be available.

For more detail read the paragraph Content hub in "Technical Stuff" section.

SEE ALSO:

3.10 Finalise.

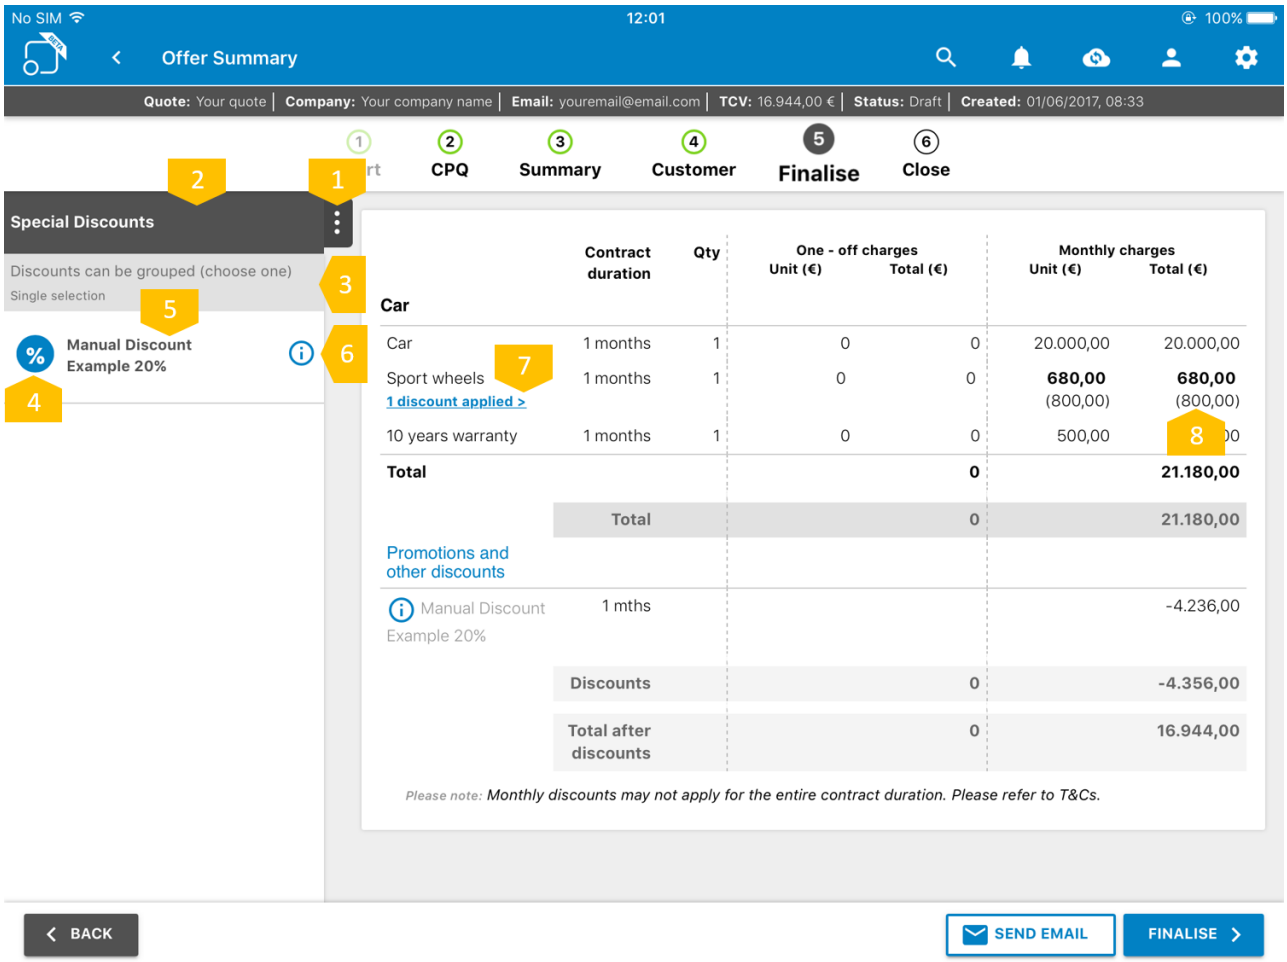
3.9 Using the hidden discounts menu

QUOTE, QUOTING, SALES, DISCOUNTS

Applies to: Mobile, Web

After sending the email to your customer, the hidden discounts will be made available.

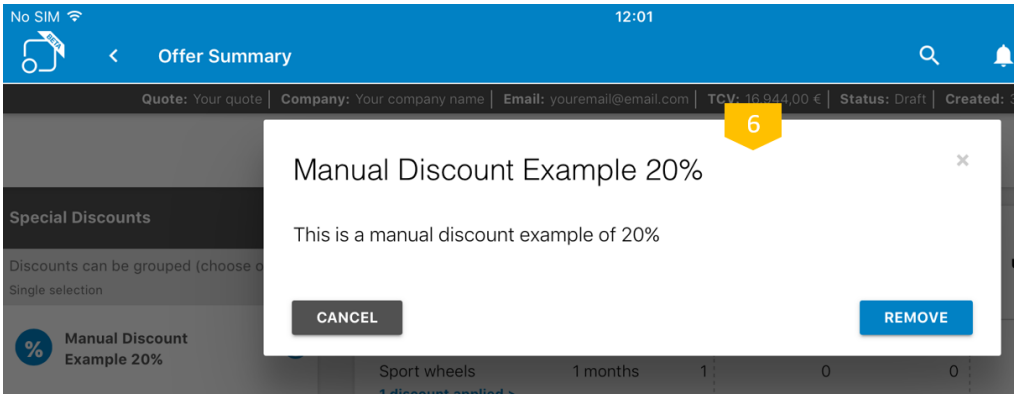
You will be able to discover the hidden discounts menu by tapping the button ⋮.



Hidden discounts menu on Mobile

1. The button allows to open/close the Special Pricing panel with a sliding animation. The summary table will be resized when discount panel is displayed. Tapping it you will find all discounts applicable to the quote.
2. The header of the panel has a fixed position. The list of discounts is scrollable.
3. Every group has:

   a. Title;
   b. Hint about the kind of selection (single or multiple);
   c. If no manual discount is available, courtesy message will be displayed.
4. Icon for absolute, percentage, proportional (different kind of discounts).
5. Clicking on the discount label or specified icon, the discount will be immediately applied or removed. Active icon (in blue) and label are displayed when user has already selected the discount. Overlay "Applying discounts" will be displayed while system is applying the discount.
6. Clicking on "info" icon, the discount details will be displayed in a popup.



Info icon popup

7. Under the product name there is a link with the number of the applied discount. Tapping it, it will be displayed a breakdown modal.
8. Discounted prices will be added to each item impacted from the selected discount. The just discounted price is displayed and under it (in brackets) the initial price will be kept.

Within summary you display both Promo and Discounts.

In "Promotions and other discounts" section, you display promotions and discounts applied to the whole quote.

Remember that the quote remains in draft status up to the finalisation. Finalisation is the process that allow you to finalise the quote created. To go on the next step you have to tap the FINALISE > button.

Remember: To enable a secret discount in hidden menu you should sent to your customer the quote at least once.

3.10 Finalise

QUOTE, QUOTING, SALES, FINALISE, FINAL

Applies to: Mobile, Web

To finalise the quote you have to tap the FINALISE button.
After you finalise the quote you will be redirected to the last page of the sales journey where you will be able to: SEND EMAIL CREATE A COPY HOME.
You will be able to start the finalisation process even if the device is offline. In this case the process will go into the "In progress" queue and will be completed when your device will be online again.

SEE ALSO:
4.3 Work offline.

3.11 Share the Final quote

SHARE, SHARING, QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO

Applies to: Mobile, Web

Share the finalised quote with your customer, even if you are offline by tapping the SEND EMAIL button.
A quote will be a PDF containing all quote details, promos, and secret discounts too.
If you are offline the email will be queued and sent only when your device is back online.
In the PDF of the quote sent to your customer there will be a summary of all products, carts, promos, and discounts applied to the quote and technical details or images of products.
For more detail read the paragraph Content hub in "Technical Stuff" section.

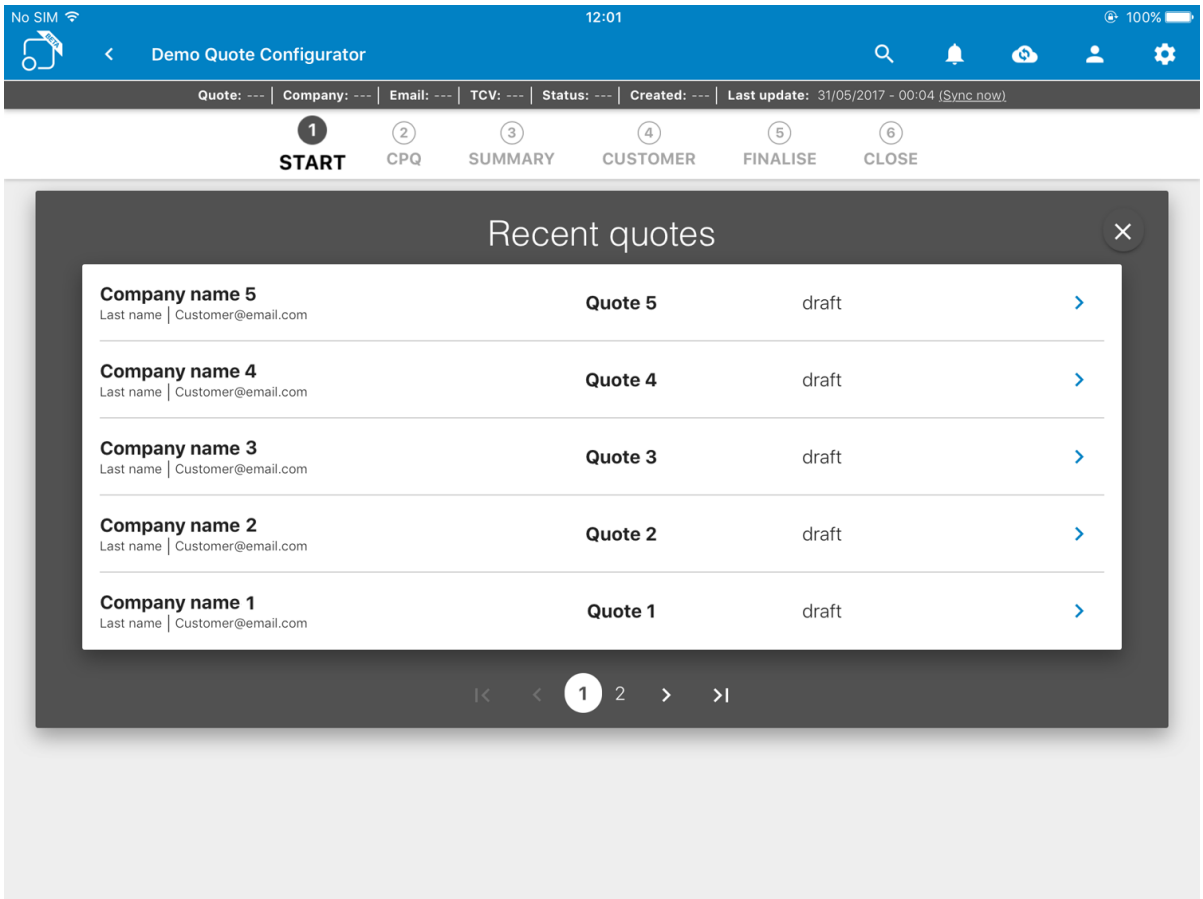
SEE ALSO:
3.8 Send Draft Quote;
3.10 Finalise.

3.12 Load Previous Quote

QUOTE, QUOTING, SALES, CROSSELLING, UPSELLING, PROMOTION, PROMO

Applies to: Mobile, Web

After tapping on the Quoting tool, on the starting page you will be able to open a recent quote by tapping the RECENT QUOTES button.
Tapping it you will see your recent quotes' list, containing both Draft and Final quotes.



Start page of quoting tool, recent quotes on Mobile

In case you choose a quote in Draft status you will land on the configurator page, if you choose a quote in Final status you will land on the last page of the sales journey where you will be able to: SEND EMAIL CREATE A COPY HOME.

SEE ALSO:

3.3 Easily create a new, perfect quote;

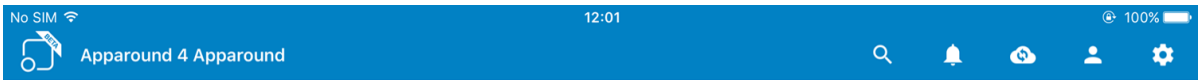
3.4 Quoting Tool;

3.10 Finalise.

3.13 Share your business card

SHARE, SHARING, PROFILE, BUSINESS CARD

Applies to: Mobile, Web



Toolbar

On the toolbar you will find your profile section .

Tapping it you will find your business card containing your photo and all your contacts. The business card will be displayed in accordance with your company rules and structure. Check your contact details and send them to your customer.

Tapping the settings button you will find some advanced actions that will help you to edit how your business card looks.

To find out how to customise your business card read the paragraph Edit your business card in "Apparound Advanced" section.

SEE ALSO:

4.2 Edit your business card.

4 Apparound Advanced

4.1 Password Recovery

LOGIN, PASSWORD

Applies to: Mobile, Web

If you've forgotten your password you'll be able to recovery it by tapping the "Forgot password?" link.When you tap that link the system will redirect you to the password reset web page.

Here you will have to fill out your Username and tap the SEND button. An email containing a pin to set a new password will be sent to you. After you will have to insert the pin, confirm it tapping the CONFIRM button and you can choose the new password.

SEE ALSO:
1.2 First Access.

4.2 Edit your business card

PROFILE, BUSINESS CARD, CAMERA, PHOTO

Applies to: Mobile, Web

Apparound gives you the possibility to edit your business card in the advanced settings of your profile section.
In this section you will be able to manage your business card: easily update a profile photo using your device or choose an existing one from your personal gallery.

SEE ALSO:
3.13 Share your business card

4.3 Work offline

OFFLINE

Applies to: Mobile

Apparound gives you the freedom to work in offline mode too. A great advantage that will allow you to work everywhere.
Remember to save all content for offline navigation at the first start up of the app to ensure that you can use the offline functions in the best way possible.
In case in which to save all content for offline naigation at the first start up is unsuccessful you will be able to launch this function manually, an option under the menu in the bar of your home page titled Save content offline.
For more detail about the manual save of all content offline read the related paragraph in the "Technical Stuff" section.
Functionalities that need an internet connection will be accomplished, but updated only when your device will return online.

SEE ALSO:
1.2 First Access;
5.1 Save content offline;
5.3 Reset all content and settings;
5.4 Content hub.

4.4 Working with Files

CONTENT, FILE, DOC, PDF, EXCEL, PPT, IMAGE, VIDEO,

Applies to: Mobile, Web

Work with all kinds of files supported by your device and made available to you. Browse a folder, read a PDF, a doc, an excel, play a video, view an image and more. On mobile you will be able to open and browse all files supported by your device inside the app itself or in an external app. Each type of file will allow you to perform its own contextual actions.

PDF files can be opened (allowing you to do all contextual actions available) or encrypted. In case of encryption you will only be able to open them with the Apparound app and you will be unable to print them.
All files are available in offline mode, including videos, in accordance to the first save content for offline navigation done at the start of the app. For more detail read Save content offline paragraph in "Technical Stuff" section.

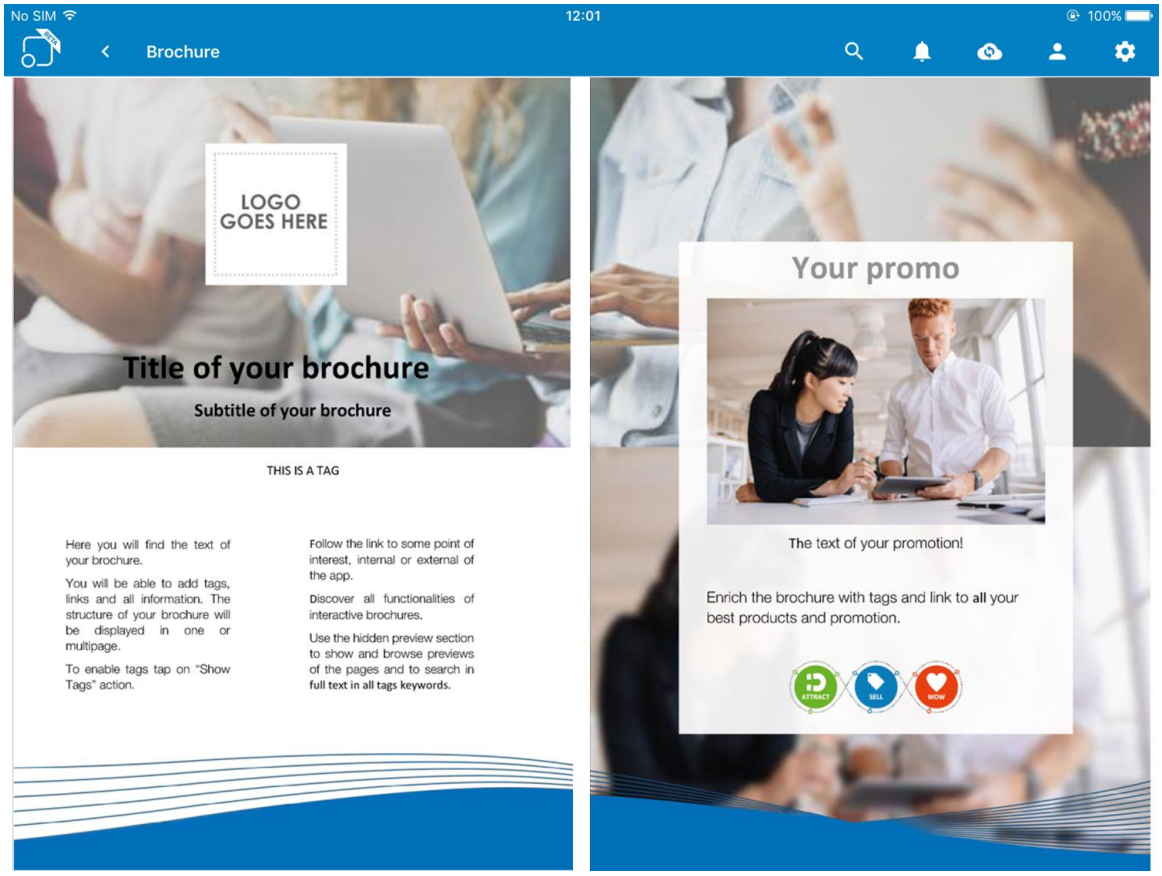
SEE ALSO:
3.2 Show and Share latest sales material;
4.5 Working with Brochures;
4.6 Working with Catalogues.

4.5 Working with Brochures

CONTENT, BROCHURE, MARKETING

Applies to: Mobile, Web

Discover all functionalities of interactive brochures.
Your brochures can be enriched with tags, links that will lead your navigation to some points of interest, internal or external of the app.
To show and browse tags use contextual actions.
Contextual actions will help you to add notes too.
Use the preview section to show and browse previews of the pages and to search in full text on all tags.



Brochure on Mobile

SEE ALSO:

3.2 Show and Share latest sales material;

4.4 Working with Files;

4.6 Working with Catalogues.

4.6 Working with Catalogues

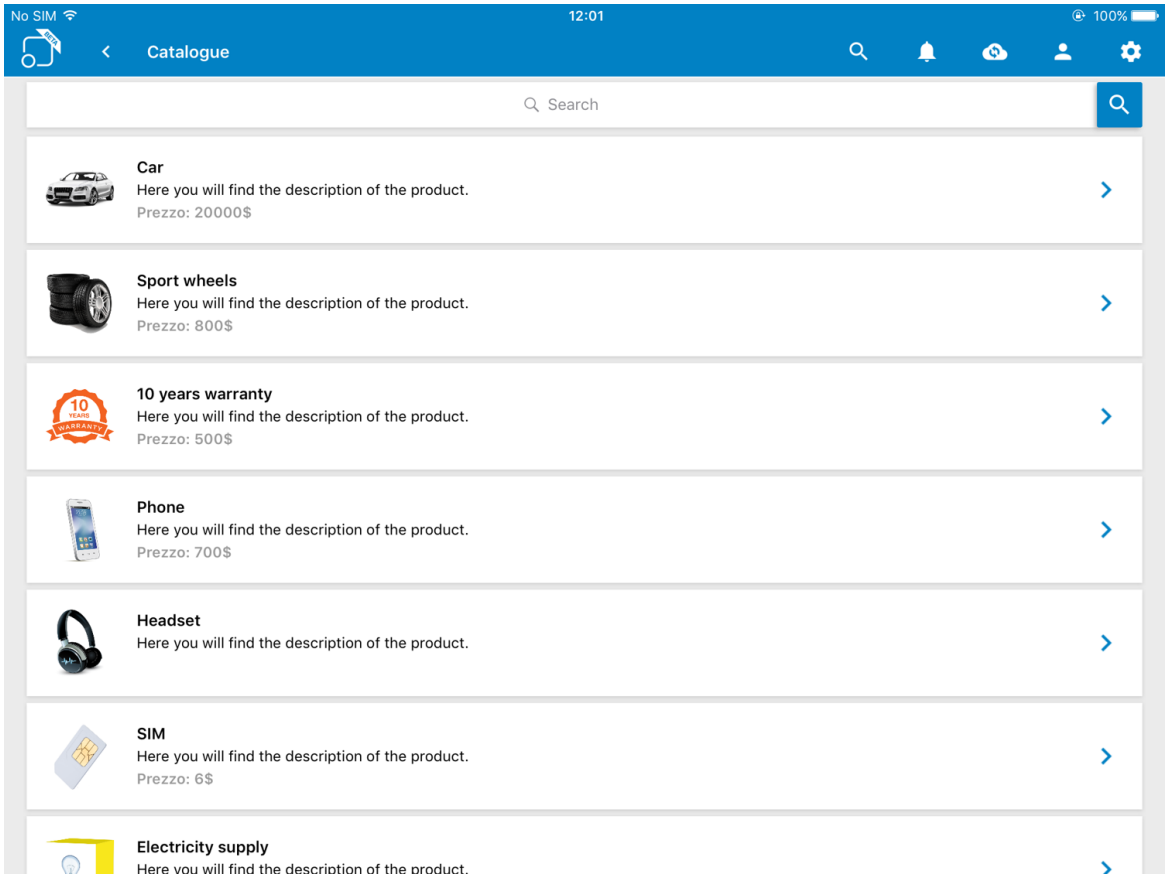
CONTENT, CATALOGUE, MARKETING

Applies to: Mobile, Web

Show your customer all of your latest products or services.

You will find all your catalogues on your home page. Tap one to open it and browse its pages.

Open attachments to show further product details to your customers and choose whether to send these details by tapping the "send" functionality.



Catalogue on Mobile

The fields displayed in each catalogue could be different, depending on the admin portal settings.

SEE ALSO:

3.2 Show and Share latest sales material;

4.4 Working with Files;

4.5 Working with Brochures.

4.7 Update the App manually

CONTENT, MATERIALS, MARKETING, SALES, UPDATE

Applies to: Mobile

You can decide when to synchronise your application by updating it manually.

It's simple: tap the ⚙ button and select Get content updates option.

By tapping it the system verifies if there are any updates of your content and, if it finds something new, it will download the updates

This operation requires an active internet connection. For more details check the Save content offline, First download of all items, Reset all content and settings and Content hub paragraphs in "Technical Stuff" section.

SEE ALSO:

5.1 Save content offline;

5.2 Restore quote configurators;

5.3 Reset all content and settings;

5.4 Content hub;

5.5 Notifications.

4.8 The importance of Logout

LOGOUT, SECURITY

Applies to: Mobile, Web

Ensure that you log out from Apparound when you are done. It's available under Profile 👤 section.

This simple action will allow you to keep you and your customer's data safe. Remember that, if you have checked the "Keep me signed in" option before logging out of the system it will only remember your username. The system will remember both your username and your password only in the case of forced closure of the app (a closure without logout).

SEE ALSO:

1.2 First Access;

4.1 Password Recovery.

4.9 Manage customer knowledge

SURVEY, DATA

Applies to: Mobile, Web

If active, you will find surveys, and different types of questionnaires to which your customers will be able to answer.
These surveys will be useful not only to collect relevant data but also to help identify your customer's needs and propose the best recommendations to him, in accordance with his answers.
Surveys can be a standard questionnaire or a quiz.
A standard questionnaire is made up of a series of questions to which the user will be able to answer.
Instead, a quiz is a special survey with a minimum score assigned that the user must reach to pass it successfully.
Every survey has a name, a description, a start button that will allow the user to start the survey, and a SEE DRAFTS button that will allow him to review a list of not yet completed surveys (where he can decide whether to restart and complete them) and completed surveys (in this case he will only be able to read the list).
A survey can be composed of any number of pages. There is no limit to how many pages a survey can have.
You can click on the Survey name to open the survey. The mobile app will display a new page with a summary of the survey. In details, the Landing page of the survey will show you the name and description of the survey and how many attempts are remaining (if set). By clicking on the start button you can answer all of the questions.
If it is a standard survey the user will be able to answer the questions and review his time.
If it is a quiz, the user will find a quiz and at the end of the submission he will be able to see his completion time, his score, if the quiz has been passed or not (in accordance to the set minimum score) and number of provided answers.
In the case of a quiz, for each question the system will also display the maximum score achievable.

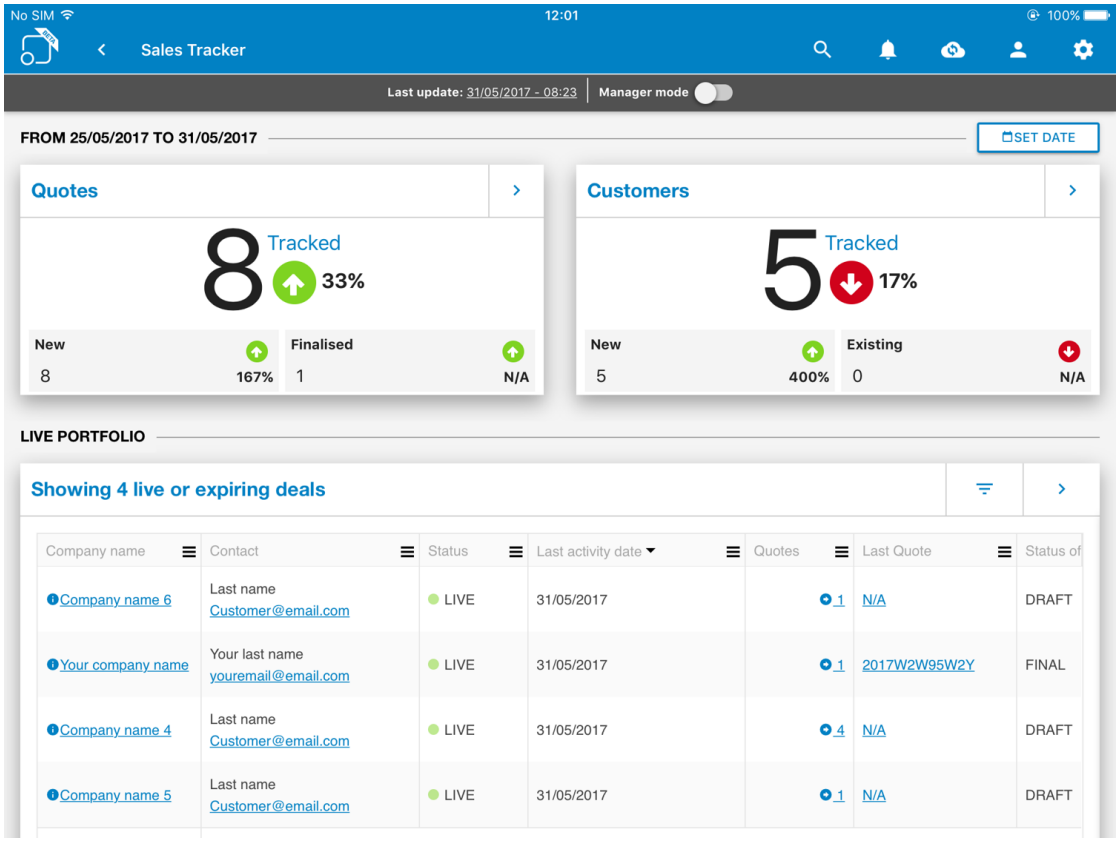
In each page, you can find different kind of questions (i.e.: multiple choice questions, star rating questions, etc.) and any number of questions.
For multiple answers you will find the minimum and maximun answer. When your answer is validated by the system you will see a green box.
After all mandatory questions have been answered the Confirm button will be activated. By clicking on Confirm the user will be able to complete the quiz and the widget will check if the quiz is passed or not. The user can see the result in the Summary. By clicking on the Continue button the system will go back to the home page.
Please note that quiz results will be judged by the server after synchronisation. The widget will try to send the quiz to the server simultaneously, but if you are working in offline mode this check will be performed after the next synchronisation.

4.10 Track your quotes and your customers

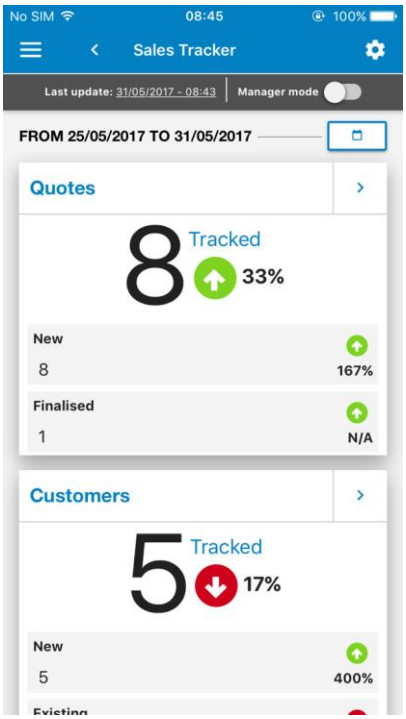
SALES TRACKER, QUOTES, CUSTOMERS

Applies to: Mobile

If active, you will find Sales Tracker, a module which provides a dynamic dashboard for sellers to track their most important quotes and customers.
Using Sales Tracker sellers are empowered by a new tool that helps them to follow up customers and track activities.
You'll quickly see the progress of your sales activities in a period you set. You can access the data of your quotes and update your customers data . You can review the status of your quotes and your expiring or live deals.



Sales Tracker on Mobile



Sales Tracker on Smartphone

You can drill down through tracked, new, finalised quotes or tracked, new, existing customers in a specific period you set tapping the displayed number into the dashboard or you can view the whole list of your quotes and your customers tapping the related › button into the dashboard.
With Sales Tracker, you can easily send to your customer's contact an email only with one tap or edit your quotes opening the related quote configurator.
Finally, for every customer you can view a dashboard that summarises activities you have done towards him.

4.11 Overview on your Team's activities and apply special discounts

TEAM, MANAGER, DISCOUNTS, QUOTES, CUSTOMERS

Applies to: Mobile

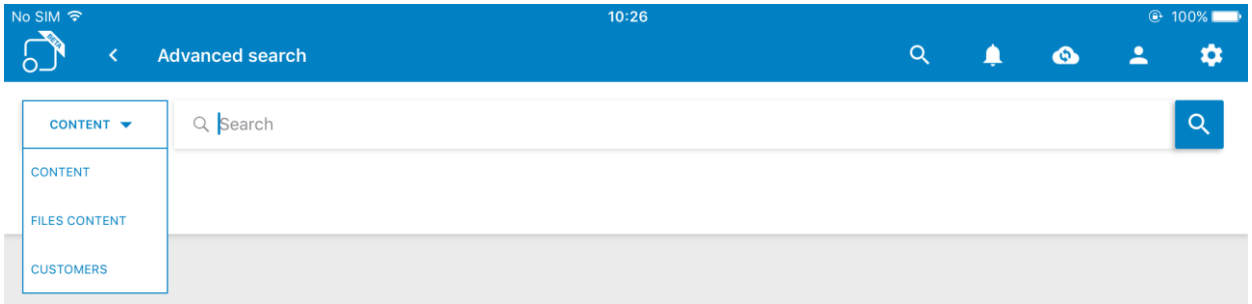
If you are a manager with an assigned Team set by your admin, you can also view quotes and customers of your sellers. Tapping the Manager mode button at the top you switch on Manager mode and you are able to have an overview of your Team's activity. You can view the same information and do the same action as a seller (described into the previous paragraph) but now all data, dashboards and list are updated with the ones of your sellers.
As Manager, you can update data of a customer of your seller and you can apply special discounts outlined only for you and not available to your Team on a quote done by your seller. This functionality is available not only on tablet but also on smartphone.
Remember that Manage mode is available only in online mode.

4.12 Search within content, documents and customers

SEARCH, CONTENT, FILES' CONTENT, CUSTOMERS, DOCUMENTS

Applies to: Mobile

Search allows you to find quickly content, documents and customers. Tapping it a popover is displayed and you can immediately search within app's content. If what you are searching is within your files or your customers, you have to only open advanced search tapping the magnify button into popover and then select the specific context tapping the CONTENT button.



Advanced search

Remember that you can search within files' content only in online mode.

5 Some Technical Stuff

5.1 Save content offline

SYNCHRONISATION, TECHNICAL, SAVE CONTENT OFFLINE, UPDATE

Applies to: Mobile

In your first access to the app the system may ask you to save all content for offline navigation in the app. If you accept, all content will be downloaded and will be available in offline mode too.
If you choose to skip this you will be able to use your app in online mode and you will download specific content when you tap it.
If you have a video set by your admin in "streaming" mode (instead of "download" mode), you will be able to play it only in online mode.
For the First save content offline action a wi-fi connection is recommended.
Sometimes, to be sure you are showing your customer the latest version of content it is useful to download all content in the app by the contextual button on the bar. This is the refresh of the content tree and the content inside of it.

5.2 Restore quote configurators

RESTORE, CONFIGURATOR

Applies to: Mobile

You have the possibility to reset only the “configurator”, the tool that allows you to make quotes, after using it. Using this functions, quote configurators settings are restored to their factory values.
If you confirm to perform this function while you are in a folder or in another content, you will be redirect to the homepage.

5.3 Reset all content and settings

RESET, LOGIN DATA

Applies to: Mobile

By tapping on the ⚙ button you will find an Reset all content and settings option.
Using this function you will delete all saved content and login data, you will be logged out and the app will be closed.
As reset quote configurators function, described in the previous paragraph, *if you confirm to perform this one while you are in a folder or in another content, you will be redirect to the homepage.*

5.4 Content hub

IN PROGRESS, ERRORS, SYNC

Applies to: Mobile

Keep track of your work on your device with the In progress section, accessible by tapping the button (Content hub menu). The "In progress" list consists of all operations waiting for connection for the closure.
In offline mode you will be able to do all of the main action such as the creation of a quote, browsing content, and sending emails too (in this case the email will end up in queue and will be sent when the device is connected).
Near each item in the In prgress list you can see its status. Items can have different statuses, depending on their synchronisation.
The statuses that you will find are:

In progress items Status	
WAITING	the item is not yet synchronised
PROCESSING	the item is synchronising
SENDING	the item is being sent to the server
UPDATING	the item is being updated from the server

When a synchronisation is successfully completed, the item is no longer displayed in the list.

You can also know if an error has occurred by tapping the Errors menu.

5.5 Notifications

NOTIFICATION, ADS, ADVERTISING, APP NEWS

Applies to: Mobile

Within notifications section you can view advertisig and app news that your admin has notified you. For example you can see again the potential advertising displayed on your first access or the news regarding an updated content if your admin has set it.
