

Red Alert ID

Next-generation lone worker protection in a discreet identity card holder format — with instant ARC support, two-way audio & GPS/GNSS tracking

One-touch & automatic ARC escalation

Two-way audio & silent monitoring options

Multi-satellite positioning & BS 8484 compliant

When lone workers face risk, delay is not an option. RedAlert ID is our discreet, next-generation, wearable security device — designed to keep individuals connected, protected and supported throughout their working day. Housed in a familiar identity card holder format, it appears entirely innocuous to others, discreetly concealing advanced safety technology in a lightweight, low-profile design.

Fully compliant with BS 8484 and powered by a multi-network roaming SIM and the latest global satellite positioning technologies, RedAlert ID ensures users can be located and supported instantly — wherever they are in the world.

One-touch instant support

A single press of the 'Red Alert' button connects directly to our fully-accredited, UK-based Alarm Receiving Centre (ARC). Location data and live audio are transmitted in real time, allowing our expert operators to assess the situation, offer reassurance, and escalate to emergency services if needed.

The embedded microphone also enables silent monitoring, allowing ARC operators to listen in discreetly — ideal for situations where the user is unable to speak.

Automatic escalation — when the user cannot call for help

In critical situations where a user is incapacitated or unable to raise a manual alert, integrated fall or tilt sensors automatically notify our ARC, ensuring assistance is on the way.

Manual escalation — putting control into the user's hands

RedAlert ID offers three layers of intelligent, user-triggered escalation options:

- **Red Alert:** Discreet one-touch SOS button for instant connection to the ARC
- **Amber Alert:** Users can leave a voice note describing their location and activity prior to entering a high-risk environment — a valuable audit trail should an incident occur
- **Amber Timer:** A configurable safety countdown that automatically raises an ARC alert if the user fails to check in before expiry

Discreet by design

Visually indistinguishable from a standard ID badge, and often worn on a lanyard, RedAlert ID blends seamlessly into any role. It's simple to use, lightweight to wear, and unobtrusive in any setting — providing dependable protection without drawing attention.

The result?

Greater peace of mind, smarter protection, and faster, automated assistance when it matters the most — helping your lone workers stay confident, safe, and supported in any situation.

Security you can trust

As part of the trusted Orbis Lone Worker Solutions range, the RedAlert ID is fully supported by our UK-based ARC, providing expert advice and rapid response 24/7/365 — for complete peace of mind.

Solutions for every sector

- ✓ **Social housing, healthcare & outreach** staff entering properties alone
- ✓ **Enforcement officers & environmental teams** in public-facing roles
- ✓ **Utility & field engineers** operating in remote or high-risk areas
- ✓ **Retail, logistics & transport** operatives — including out-of-hours staff
- ✓ **Contractors, cleaners & maintenance teams** across wide or vacant sites
- ✓ **Education & campus** personnel working alone across large estates
- ✓ **Journalists & media professionals** working in the field
- ✓ **Security patrols & parking enforcement teams** requiring discreet escalation
- ✓ **Remote or home-based workers** needing emergency support

Why clients choose RedAlert ID

Compact & discreet: Looks like a standard ID badge, with no visible tech

BS 8484 compliant: Fully certified to UK lone worker safety standards

One-touch Red Alert: Instant access to our 24/7/365 ARC

Live two-way audio: Direct contact with ARC during an incident

Silent monitoring option: Discreet audio access when user unable to speak

Amber Alert & Timer: Pre-emptive safety features with auto-escalation

Multi-satellite tracking: GPS/GNSS location with real-time updates

Roaming SIM: Cross-network coverage for reliable connectivity

Secure online portal: Real-time status, audit trails and incident logs

Peace of mind: 24/7/365 nationwide support from Orbis' ARC
