## SAP INTEGRATION CERTIFICATION

SAP SE hereby confirms that the ABAP interface software  
for the product

### Compleo Suite 6

of the company

### SYMTRAX SA

has been certified for integration with SAP NetWeaver 7.0 via the  
SAP integration scenario *ABAP Add-On Deployment for SAP NetWeaver*.

This certificate confirms the technical and syntactical consistency of the Add-On in  
accordance with SAP certification procedures.  
SAP only certifies successful integration of the product with SAP solutions. Vendor is  
responsible for the product itself and its error-free operation.

The certification test is documented in report no. 33043317  
and expires June 1, 2018.

Vendor Hardware: PC-Pentium, x64

Vendor Operating System: Windows Server 2008

SAP Test System: SAP NetWeaver 7.0

### 2. Functional Overview

Supported Functions and Business Processes – General Description	
Overview on the functionality and the purpose of the 3 <sup>rd</sup> party product.	<p>Compleo Suite is a powerful Output Management and Formatting software, designed to manage, convert and distribute output files from an SAP system. Compleo runs on a Server running windows and can connect to multiple SAP systems using the RFC protocol. It reads information present on these systems to provide extensive control and ease of use for the Customer, even providing bi-directional communication and callbacks if needed.</p> <p>It provides fully-featured design, formatting, distribution and archiving capabilities for business documents of all kinds, with full control over character fonts, patterns, borders and colors, inserting logos, images and generating bar codes.</p> <p>Thus Compleo integrates within the SAP environment and can treat all types of spools, be it output from Business reports, SAPScripts, SMART Forms etc. using a powerful SAPGOF interpreter and easy to use formatting and printing interfaces.</p> <p>Explorer module can achieve data modulation from SAP business reports and make them available in Microsoft Excel etc.</p> <p>Visual enhancement and addition of new elements like BarCodes to the users existing spools can be easily achieved in Layout.</p> <p>Complete designing of output documents from Raw data spool formats like IDOC, XML, RDI, XSF and XFP can be done using Designer.</p> <p>And complete automation of output formatting and distribution is achieved through Compleo Supervisor.</p>

## 2.1 Complete List of used and released SAP objects

The list below has been given to SAP by the Vendor, for referencing purposes. SAP cannot guarantee that it's complete.

## 3. Performance

### 3.1 Performance and Scalability

Overview on the architecture and design of the product including performance and scalability.	<p>4 RFC enabled Function modules are installed on Sap system. These are called by Compleo using the .NET Connector 3 provided by SAP. The architecture of Compleo is modular and changes can be made to the different parts independently without changing other aspects of its functioning.</p> <p>Also multiple instances of Compleo supervisor can run in parallel to provide high level of performance by load sharing.</p> <p>Compleo inherently supports multiple connections to different SAP systems. Thus scalability can be easily achieved without the need for any new installations and is an important aspect of its operations.</p>

### 3.2 Quality Assurance

Overview on Quality Assurance procedures from the vendors to assure that the interface design and performance consistently conform to specified requirements.	Installation of test environment and process of test grid on all functionality for each test environment. Tests for the interface and connectors are done by a test team at every release of Compleo Suite. Compleo Suite 6 has been rigorously tested during development and latest series of test grids were run in March 2015

### 7. Partner Confirmation

Partner states that by following the guidelines of the ICC Integration Assessment or ICC Integration Guide, only the integration technologies listed in this document are used in the described interface software.

ABAP add-on deployment Certification is only valid for the SAP release and partner product release noted in this document; in the event of SAP or partner release changes SAP offers re-certification of the interface software.

The partner solution **has not been deployed or tested on SAP Solution Manager** as part of the certification procedure. It's therefore not "certified for SAP Solution Manager".
