

INTEGRATION AND PAYMENT SECURITY CLOUD PLATFORM

Delego Core

Best-in-class integrated payments solution for SAP merchants

Winning businesses know that saving time and money is essential to be able to grow, compete and succeed. Partnering with Delego integrates your e-payment ecosystem with SAP, automates your order-to-cash process, and secures the enterprise against cardholder data breaches allowing you to focus on what matters; growing your business.

Delego Core provides a unified platform to facilitate e-payment acceptance, SAP integration, and data security.

Delego Core

KEY FEATURES

SAP integration

Managing disparate systems, time-consuming reconciliation, and risk of manual error are common challenges when your SAP order-to-cash, accounts receivable, and collections processes are not integrated into your e-payments ecosystem. Delego's integrated payment solution leverages SAP as the system-of-record allowing you to manage critical payment functions like authorization, settlement, and reconciliation directly into SAP.

Tokenization

With data breaches on the rise, the benefits of tokenization quickly become evident. As a PCI Level 1 Service Provider, Delego tokenizes cardholder data from inception, allowing you never to process, transmit or store unsecured card data, reducing and streamlining your PCI compliance scope. Delego tokens are processor-neutral and can be used for recurring transactions.

Delego Secure for SAP

Delego Secure for SAP intercepts sensitive card data before it enters your enterprise system or applications, and replaces it with a secure token. An 'Enter Card' button on your order entry screen is utilized to launch our secure IFrame. The credit card data is entered, tokenized, stored in the Delego cloud, and returns a token to your SAP system keeping your SAP environment out of PCI scope.

Analytics and reporting

Delego Core allows you to view transactional activity across multiple processors, providing a consolidated view of your e-payments ecosystem. Our flexible reporting allows us to slice and dice the information in a customized way to meet your reporting needs.

CLOUD BENEFITS

Ease of deployment

Delego Core implementation can be completed in eight weeks or less, requiring minimal customer IT and testing resources.

New features

Get access to all the latest improvements and product advances the moment they are available to grow your business.

Cost

Predictable monthly SaaS pricing allows for simple budgeting and provides significant TCO savings.

Security

Delego ensures payment card data never enters your SAP systems, eliminating the exposure of card data in the event of a data breach.

PCI compliance

Leverage our PCI DSS Level 1 Attestation of Compliance and use an SAQ-A with less than 30 audit controls.

Data sovereignty

Secure and store data in any of the nine global data centers, minimizing EU data privacy and GDPR compliance burdens.

Support

Delego proactively monitors your systems for high-availability. In the unlikely event of a service disruption, our support team is alerted and available 24/7 to ensure prompt resolution.

Scale

Infinitely scale as your business grows without operational and infrastructure expenditures.

Disaster recovery

Delego provides automatic fail-over without interruption utilizing Amazon Web Services three-way continuous availability model with distinct availability zones.
