This document provides Functionality of App and Instructions for App Installation

2. Inventory Manager Application

The Mobile Inventory Manager Application can support the various inventory operations in the warehouse as listed below:

Manage Stock & Stock Single Material

- Inventory management is the process of efficiently monitoring the flow of products into and out of an existing inventory in the warehouse, this process involves controlling the receipt of products to prevent the inventory from becoming too high where items are stored at an unnecessary cost, or too low where it can cause a stock-out and production could be halted due to lack of raw materials.
- Ability to display a stock overview of a single and stock balances for the following stock types Unrestricted-use stock, Blocked stock and quality inspection.

Stock Multiple Materials

- Warehouse Clerk/Inventory Manager can perform stock overview of multiple materials and review the stock by plant and storage locations for day to day warehouse activities. As an inventory manager in his daily work can view the stock at different stock types like Unrestricted, Quality Inspection and Blocked Stock and value of the stock. Once App is installed within our mobile
