EY Digital Boardroom for CFO

Better Questions, better the decisions !!
Current Challenges of CFO

Today's decision-making

- Decisions are made based on outdated data which is collected and visualized manually
- Lack of visibility - reliance on spreadsheets unique to each business unit with own IT set-up
- Missing holistic view - limited understanding of how decisions might impact performance across units
- Lack of actionable and interactive insights - static presentations fashioned on the past for decision-making

Decision-making requirements

- Real-time data to make end-to-end decisions with more speed, ease and accuracy
- One single source of truth - one single platform capable of consuming all data sources
- Full transparency between KPIs at every organizational layer to improve collaboration between units
- Visualizations and predictive analytics that allow to analyze, plan and simulate at only the tip of the finger
Make end-to-end decisions with more confidence.

EY Digital Boardroom
What is EY Digital Boardroom?

- EY digital Boardroom is a collection of analytical and decision making scenarios built on SAP Analytics Cloud
- A single platform for business intelligence and organizational planning, predictive analytics and simulation of business KPIs
- Built on SAP Analytics Cloud, this next-generation decision-making platform leverages line-of-business data from SAP S/4HANA and other applications to provide a single source of truth for the entire organization.

Simple and intuitive web portal capable of multi screen presentation modes alongside desktop.

Native mobile applications allow you to consume on the go.

Decision-making with EY Digital Boardroom
EY Digital Boardroom revolutionizes the way a company’s critical decisions are made.

The solution helps business leader’s move from reactive to proactive decision-making based on solid real-time data.

With the power of EY Digital Boardroom, executives can dive deep into the heart of their company and gain live insights into every process and all relevant data.

The finance story enables the CFO to discuss the scenario of an upcoming situation, to analyze the impact of KPIs such as Cost of Production and Profit Margin, with a change in custom duty in a particular country which has the major share of production volume.

This also helps to discuss the further actions such as splitting the production to the nearest production unit, and also to plan the action for the board and business.

How can we help? Our service

1. **Design of the dashboard**
   - We have extensive knowledge of dashboard design and optimization, requirements gathering to full cycle implementation.

2. **KPI library**
   - Our pre-defined KPI library allows us to pick and choose already mapped & documented metrics to quickly enable design sessions and reduce costs.

3. **Pre-built content**
   - Standard prebuilt templates that boast an 80% fit reduces time and costs of implementations across each of our stories.

4. **Custom builds**
   - We can build bespoke designs from the ground up or modify prebuilt templates to fit the exact specifications of our customers.

5. **Previous experiences**
   - Utilizing the experiences of our customers to understand key requirements and drive development as an exact fit.

6. **Combining stories**
   - With multiplying systems we can combine not only many sources but many different stories into one hub as the single source of the truth with complete oversight.

7. **POC capability**
   - Our capability allows us to create proof of concepts that will enable a quick win to drive further opportunities.

8. **Differentiate our services**
   - This is one of our key differentiators in this industry and something that we are known for in the industry. Our campaigns with SAP also make us a “go-to” for them.
