

cbs Consignment Stock App for SAP Solutions

cbs Consignment Stock App for SAP Solutions enables a simple and easy handling of customer or vendor consignment stock from anywhere and any device.

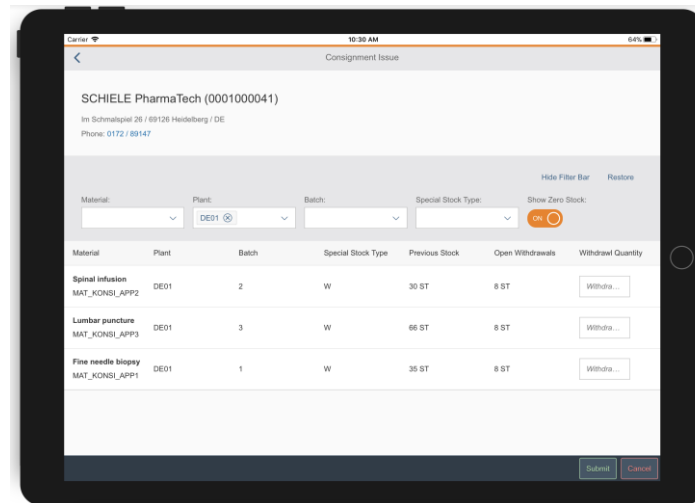

Supported scenarios:

Consignment Issue: If the customer withdraws consignment stock for use or sale, you record this transaction in the system by creating a consignment issue. The app offers you the possibility to carry out a consignment withdrawal within a few steps - select the customer, enter the quantity and post - done.

Consignment return: Consignment returns allow your customer to take back goods previously withdrawn from consignment stock. If the customer wants to reverse a previous issue, record this transaction by creating a consignment return. You can use this app to store consignment returns in the system within a few steps.

Inventory bookings: In the entire inventory posting process, you must execute three transactions within SAP: (a) Create physical inventory documents; (b) Enter a physical inventory count; (c) Post inventory differences. Perform the entire inventory process within a few clicks.

Stock Overview: The app provides a simple overview of your current consignment stocks.

Features and benefits:

Quick and easy: Consignment stock handling is now easier and faster than ever – no more complex transactions or manual paperwork.

Usability: Simple and user-friendly design - increase your productivity while minimizing employee training costs.

Flexibility: No matter if you use a S/4HANA on-Premise, S/4HANA Cloud or a SAP ERP system as backend. This app supports all of them.

Side-by-side extensibility: Solution is based on standard APIs and logic is handled in cloud. Just connect to your backend; hassle-free to use for you.

Device independent: The app can be used on all devices or platforms (Desktop, Android and iOS).

Current data: The app is always connected to an SAP system, you can constantly access and update current data.

SAP Cloud Platform & S/4HANA CloudSDK: The app runs on SAP Cloud Platform and leverages SAP S/4HANA CloudSDK. Benefit from a fast, secure and reliable handling of your consignment process.
