PLUS-IT AG: easyBI® Tiles

easyBI® Tiles: KPI-Cockpit according to IBCS®

Summary

In order to enable better operational and strategic decision-making regarding the company's goals, data concerning the company itself, competitors or even the general market development have to be analysed.

- Make strategic decisions using the easyBI® Tiles cockpit
- Information is available to all employees
- Standardized IBCS® representation ensures better readability and interpretability

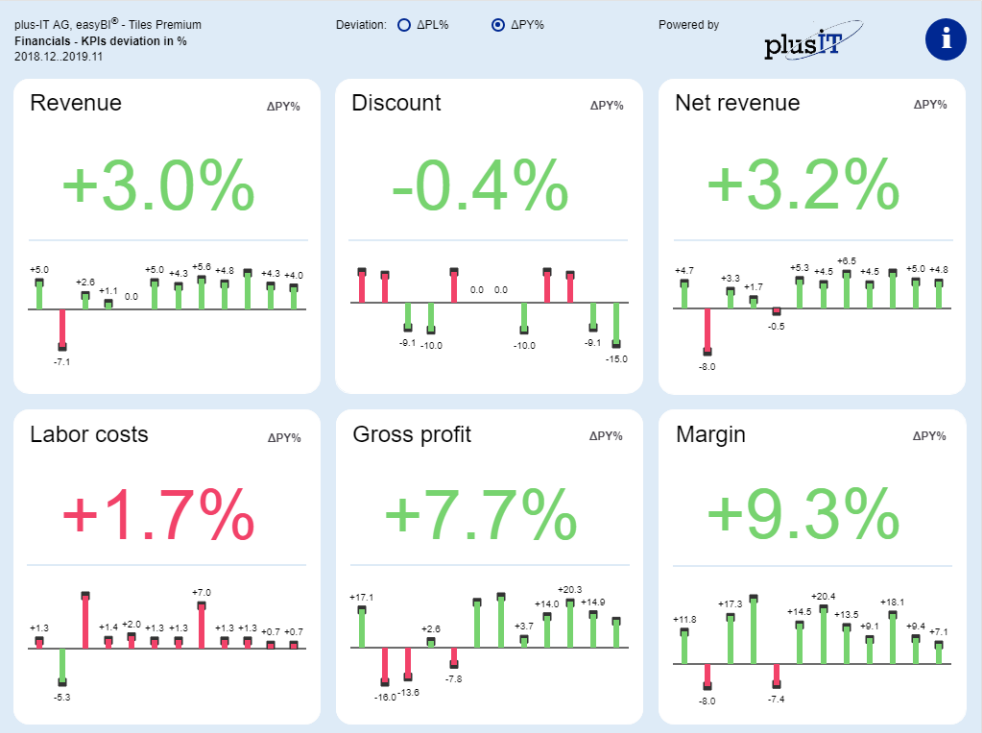
Client situation

Small and medium enterprises often do not have a good overview of all the critical KPIs concerning their organisation. Our easyBI® Tiles cockpit is a simple solution for visualizing 6 KPIs from all business units in one dashboard leveraging SAP Analytics Cloud. easyBI® Tiles can be set up using virtually any data source of choice.

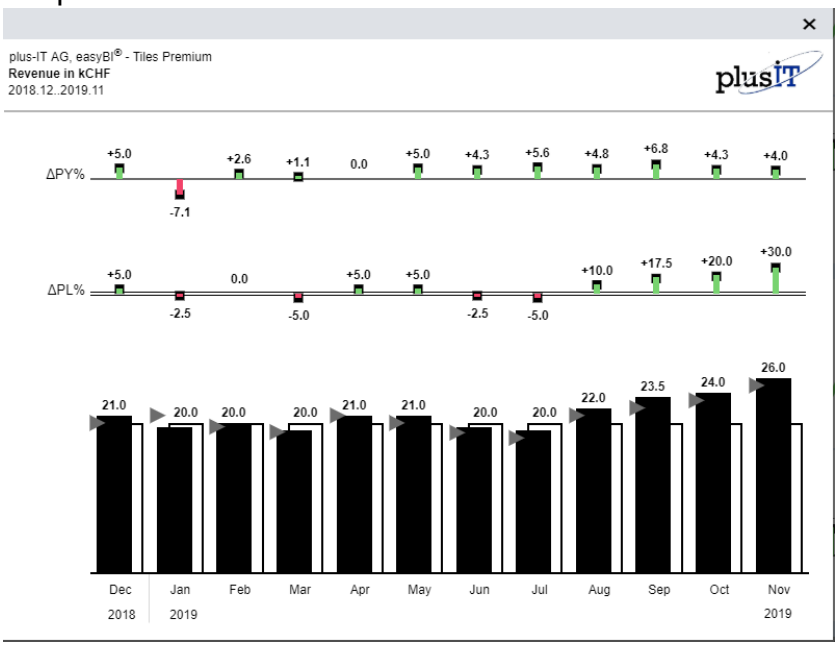
Package

easyBI® Tiles is provided as an SAP Analytics Cloud Analytical Application:

- Overview-cockpit with 6 tiles representing the relative yearly development of 6 KPIs as point-numbers as well as their relative monthly development as variance charts:



- Graphical drilldown view for all 6 KPIs

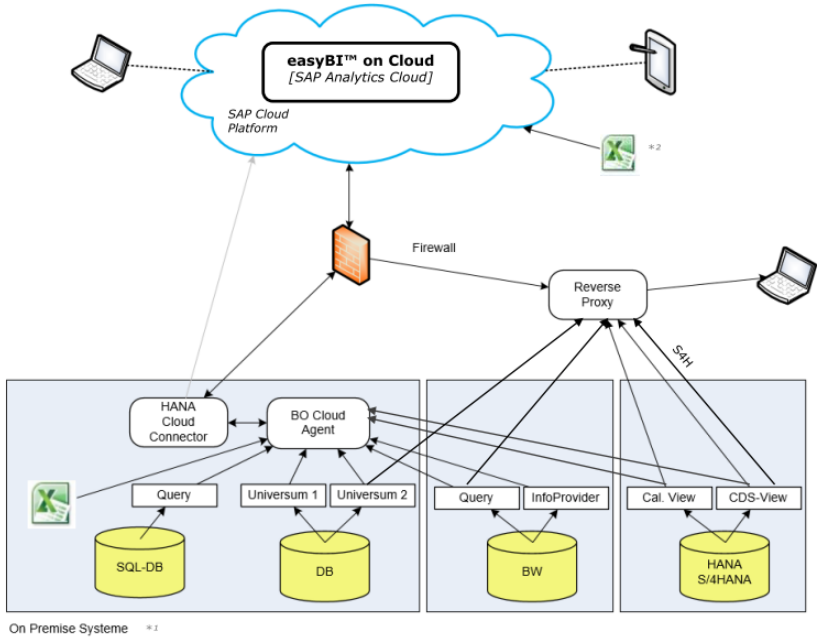


Data Sources

The following architecture representation shows all possible data source-connections to On-Premise-Systems for the easyBI® Tiles Cockpit.

It is also possible to import data from excel manually as data source.

The easyBI® Tiles -Cockpit requires at least one data source.



plus-IT AG provides support regarding the connection to the data source of choice.
