

Cybersecurity Solution

Leading Regional Water Authority

Customer challenges

A regional water authority was looking to enhance its cybersecurity measures in regional legacy infrastructures. MSI Grupo was approached to solve their problem, provide easy deployment & affordability

The Solution

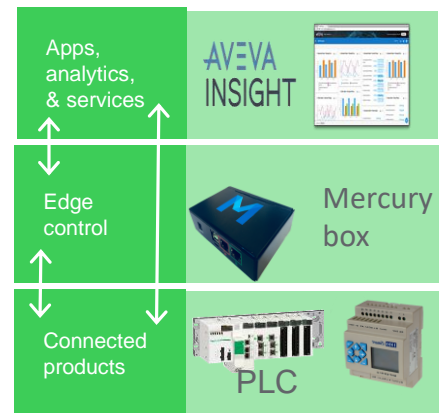

This includes a joint cybersecurity solution for EcoStruxure WWW customers. Mercury improves cybersecurity and connectivity in a seamless way with a central management console. It fortifies architectures and fosters compliance with IEC-62443-3-3. Mercury box is a combination of Schneider Electric Harmony IIoT Edge box plus Mercury edge node cipher software

Complex deployment projects and high production downtime were avoided because of the versatility and centralized management console of the solution. Mercury offers high-end security features to protect your Industry 4.0 initiatives. It is fully compatible with your existing devices, protocols, networks, and doesn't require any change of devices or configurations.

Our Technology Partner

Our Alliance Partner

“Exchange simplifies the procurement process and it's really convenient for small or medium projects.”

– Peter Craamer, Innovation Manager at MSI Grupo
