

**The world's leading high-volume email delivery platform from SocketLabs, now available on SAP App Center featuring full integration with SAP Marketing Cloud.**

## **The SocketLabs difference**

SocketLabs' founders have been creating cutting-edge email solutions for more than 20 years, leading to the ideal combination of technical platform and best practices expertise. The company's inclusion on SAP Marketing Cloud through its SAP PartnerEdge Partnership has further cemented the email service provider's reputation as industry leading and transformational. As deliverability and security become increasingly important in the digital world we live in, trust SocketLabs for all your high-volume email needs.

Available on the  
**SAP App Center**

## US-made, globally trusted

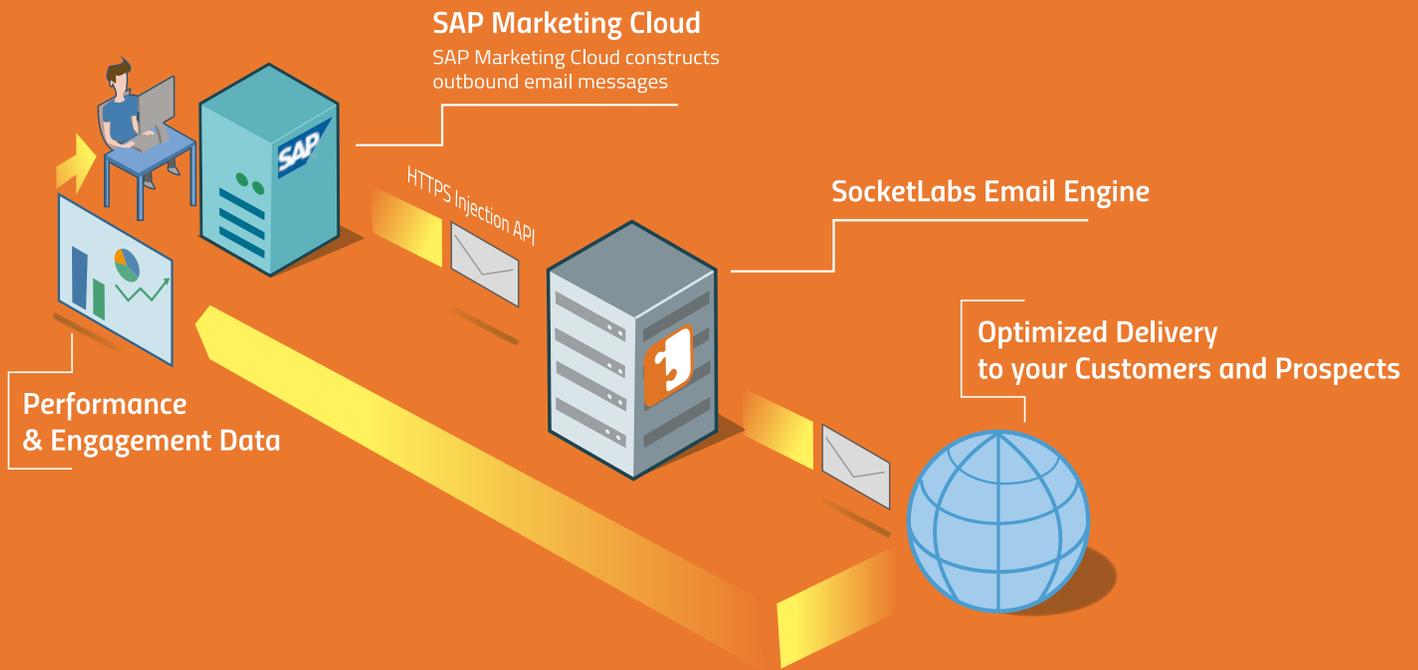

SocketLabs is based outside of Philadelphia, PA and is the only US-based email service provider in the world providing integration with SAP Marketing Cloud which is listed in the SAP App Center. Our world-class solution is trusted by companies far and wide, and across a multitude of different industries. Some of the partners we've worked with include:

## SocketLabs – An official SAP Partner

SocketLabs, the industry leading email service provider (ESP), is an SAP PartnerEdge Partner, bringing its superior and user-friendly technology to SAP Marketing Cloud, the centralized hub used by marketers, developers and IT professionals around the globe.

# Hitting the Inbox: SAP Marketing Cloud with SocketLabs

## Email is the engine that drives businesses

Did you know that 20% of the world's legitimate business emails are excluded before reaching their intended recipients? That number only continues to grow due to bad actors and cybersecurity concerns, meaning companies that distribute email in high volumes need to ensure they have the proper solution in place to ensure complete deliverability and security. To tackle these issues and meet the needs of our customers, SocketLabs is proud to offer:

Technical maturity  
and reputational strength

Comprehensive  
authentication support

Message encryption  
for security and privacy

Stream-level performance  
tracking and optimization

# What SocketLabs customers are saying:

**“ The customer service for SocketLabs is absolutely incredible. It’s refreshing and humbling to get such a high level of customer service from an online service.”**

Mark Evans | Candidate Video  
[www.candidatevideo.com](http://www.candidatevideo.com)

**“ It’s vital to have reliable email notifications accompany each election or I won’t stay in business. We selected SocketLabs and have never looked back.”**

David Simms | President & Founder  
ElectionsOnline

**“ We can’t do business without email and SocketLabs makes email happen for us. We could have picked tons of providers but I am glad that we chose SocketLabs. SocketLabs doesn’t just work, it works WITH us.”**

Jason Storey | IT System Administrator,  
Mage Solar Projects, Inc.

**“ I just wanted to let you know that your email service ROCKS!! It really has blown away my expectations! Anytime I can send almost 150,000 emails in a day without a single owner complaining – that’s impressive!!”**

Owen Ellington | IT Director,  
PIU Management, LLC
