ANDX TIMEKEEPER Application

OVERVIEW

Transparent and easy monitoring of time efficiency

ANDX Timekeeper is the first application for SAP Sales or Service Cloud to offer a management control system for monitoring, control and evaluation of cloud work time.

Get a real picture of your teamwork-------------------

Helps keep tabs on SAP Sales or Service Cloud users when they are using a cloud solution and helps you see how many hours they spend working on the various tasks. Offers a management control system for monitoring, controls and evaluation. It also offers predefined reports, which can be adapted to the customer's needs based on their management requirements.

ABOUT ANODIUS

We are consulting company providing end-to-end CX, CRM business solutions employing SAP and Salesforce platforms.

Right from the start, we wanted to bring together a solid set of people who want and can create exceptional customer experiences.

Our vision is to be a company with a strong international CX, CRM know-how, whose reputation is built on a long-term trust and satisfaction of customers, business partners and company employees.
**BUSINESS BENEFITS**

Be a manager-------------------------------------------
Do you like to keep an eye on tasks and the time spent completing them? Do you need clear reports?

Become more time efficient--------------------------
Get a clear idea of how much time each task takes.

Easy decision making-------------------------------
Once you know how much time a task takes, it becomes easy to make decisions.

Improve your daily planning------------------------
Once you know how much time a task takes, daily planning is a piece of cake.

Evaluate your employees----------------------------
You can easily see which employees are above average and whose work takes more time.

Save time------------------------------------------
You don’t have to switch between different applications or programs.

Reveal weak spots in processes---------------------
The clear overview of time spent on different activities will reveal the bottlenecks in your processes.
