Discover frictionless Procure-to-Pay

Barclaycard and SAP have teamed up to deliver a game-changing partnership.

By integrating Barclaycard's award-winning B2B payment innovation, Precisionpay Bank Transfer, with SAP Ariba's Procure-to-Pay solution, there's no need to leave Ariba Network to complete a payment.

We're helping smooth out friction in the procurement process, making tracking and reconciling payments more intuitive.

Even if your suppliers don't take payments by card, Barclaycard Precisionpay Bank Transfer combines all the benefits of card payments for buyers, such as improved working capital, with the cost-effectiveness of bank transfers for suppliers.

How it works for buyers

Day 1

You receive an invoice from your supplier.

Settlement day

You can pay them using Barclaycard Precisionpay Bank Transfer (for example, at day 30).

Day 73

You can then benefit from an average of 43 days'* extended settlement.

“ Payments are now fully integrated into the SAP Ariba Procure-to-Pay platform. Our technology is making payments more efficient, not just for the buyers wanting to procure things through Ariba Network but also for the suppliers wanting to sell things to those buyers. It's a win-win for everyone. ”

David Price, Managing Director, Barclaycard
