

**The Rojo  
iSHARE accelerator**

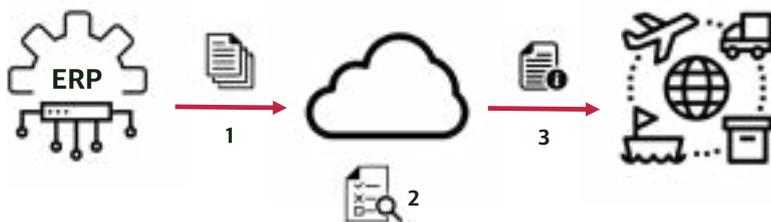

# Optimize your supply chain with the Rojo iSHARE accelerator

Supply chain optimization has become an everyday task as we are continuously having to respond to the changes in the world around us. We cannot truly optimize our supply chains unless we improve our ability to share data.

Data sharing is becoming increasingly important, not only with immediate trade partners but also with logistics companies and government authorities further along the supply chain. iSHARE helps to anticipate sooner what lies ahead, when it will happen and who is responsible for it.

## The Rojo iSHARE Accelerator

The Rojo iSHARE accelerator enables you to prepare your SAP ERP system for iSHARE implementation in a quick and easy manner. This way, adapting your current integration landscape or the messaging structure is not even necessary. You only need to join the iSHARE network and share necessary documents for your supply chain with the iSHARE foundation.

1. Supply chain business document is sent from ERP to trade partner via cloud integration.
2. Involved parties and delegation policies are validated via iSHARE.
3. Instructions are sent to the party involved in logistics.

## What is iSHARE?

iSHARE is a scheme that facilitates data sharing within the Netherlands and beyond. This uniform set of agreements provides a fully automated and reliable method for verifying the identity and authenticity of companies that request access to your data. You then decide whether to grant them access, and if so to which data.

## Plug & Play

### iSHARE as a Service

In addition to the iSHARE accelerator which you can get from SAP API Business Hub, we also offer iSHARE as a Service. This way Rojo takes care of the implementation and operational management of the iSHARE accelerator for you, plus the integration with all trade partners and logistics partners in your supply chain. In other words, we relieve you of all your integration concerns.
