

Create time by harnessing interoperability in finance!

Here at Cordis Solutions, we're strong advocates of Microsoft to SAP integration and we make sure that our products are fully SAP licence compliant. We provide intuitive and user friendly applications that will simplify your business processes using SAP and Microsoft interoperability toolkits, such as SAP Gateway for Microsoft and SAPui5 (Fiori).

Easy to use

Easy to deploy

Easy to manage

myFIdoc

myFIdoc simplifies the process of entering, reviewing and approving financial data. Your employees can quickly create, update and send the data for review and/or approval before it is posted in your SAP ECC system.

- Take the complexity out of using SAP finance
- Leverage financial transparency across your business
- Reduce transactional errors and learning time
- Intuitive user experience
- Integrated and scalable

Uniting the power of SAP with the familiarity of Microsoft Office, myFIdoc can:

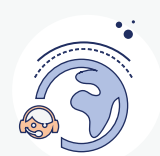

Create, update and display journal entries using existing security protocol in SAP for both user access and data.

Validate master data before it is committed to SAP.

Create multiple templates within Excel and amend approval limits of journals.

Support multi-currency & enable multi-language.
