

CORE RBI for SAP

SAP and AsInt are in a Co-Innovation to add RBI (Risk Based Inspection) as an App within the SAP Asset Strategy and Performance Management (ASPM) solution.

○ RBI APP WITHIN SAP FIORI LAUNCH PAD

- Main User interface for access to
- Equipment and Locations Registry
- Work Order Management
- RCM and FMEA
- AsInt RBI Application

○ VISUAL OF THE RBI FORMULAS

- Allow the user to review the RBI formulas being executed

○ DETAILS INPUT AND OUTPUT APP

- Allows the user to interact with the RBI inputs and outputs.

○ RBI ANALYSIS SUMMARY

- Allows the user to review, create, and delete the RBI analysis runs.

The screenshot displays the SAP Fiori launch pad interface. At the top, there is a navigation bar with the SAP logo and a 'Home' dropdown menu. Below this, there are tabs for 'AIN Applications', 'AIN Administration', 'ASPM - Administration', and 'RBI'. The main content area is divided into two sections: 'AIN Administration' and 'ASPM - Administration'. The 'AIN Administration' section contains seven tiles: 'Administration Overview', 'Network Authorizations' (3 Groups), 'User Authorizations' (8), 'Templates' (765), 'Application Settings', 'Company Profile', and 'Business Partners' (1 Incoming Invitations). The 'ASPM - Administration' section contains seven tiles: 'Assessment Templates' (24), 'RCM Assessments' (1), 'Assessments' (35), 'AsInt RBI PoC Config App', 'Documents Test123' (999, In Progress: 21), 'Speaker Countdown Test Tile' (1:00 min), and 'Risk Based Inspection ASPM'. A red box highlights the 'Risk Based Inspection ASPM' tile, with a red line pointing to a callout bubble on the right.

○ WORK ORDER AND NOTIFICATIONS

- Allow the user to review current Work Orders and Notifications, but also create new Notifications.

○ TRADITIONAL 5X5 AND ISO RISK MATRIX, config your own

- We're allowing users to choose between the traditional RBI Matrix vs. an ISO Risk Matrix

The RBI App will be downloadable from the [SAP App Center](#) for ease of use of deployment.
