The Icertis Contract Management (ICM) platform is the leading enterprise contract management platform in the cloud. ICM transforms the foundation of commerce by turning contracts into valuable corporate assets.

### The Icertis Portfolio

The Icertis portfolio consists of Experiences, Business Applications, and AI Applications—all built on top of the AI-infused ICM platform.

- **ICM Experiences** allow users to access the power of ICM from within enterprise systems like Salesforce and Office 365.

- **ICM Business Applications** apply the power of ICM to specific contract challenges including obligations management and sourcing.

- **ICM AI Applications** apply artificial intelligence to solve previously intractable enterprise contract management challenges.

- The Icertis Contract Management (ICM) Platform significantly improves contract management at every stage of the life cycle, from authoring to performance to expiry.

### The Value of Enterprise Contract Management

Enterprise contract management applies the power of the cloud and artificial intelligence to contracting in order to accelerate, protect, and optimize commercial relationships.

- **Accelerate**
  
  Increase business velocity and agility by negotiating and executing contracts faster.

- **Protect**
  
  Reduce risk and improve compliance by proactively monitoring contractual obligations and deviations.

- **Optimize**
  
  Improve decision making with advanced analytics based on a single source of truth for all enterprise contracts.

ICM Platform Capabilities

Intelligent Contract Setup
Flexibly model complex organizations, global business relationships, and contracting processes to adapt to ever-changing business dynamics.

Streamlined Contract Operations
Manage the complete contracting lifecycle to reduce cycle times, increase negotiation effectiveness, and administer your contracts at scale.

Comprehensive Governance & Compliance
Standardize and monitor your contracts during creation, negotiation, and even after execution to mitigate previously hidden risks and insure you fulfill and benefit from all contractual commitments.

Powerful Reporting & Dashboards
Leverage ICM’s advanced analytics and AI-enhanced reporting tools to improve visibility across your entire business, reducing contract cycle times, improving negotiation outcomes and increasing ROI.

The Icertis Advantage

- Easy
  Easy to deploy, use and adapt

- Intelligent
  Maximize revenue, control cost, manage risk

- Enterprise Wide
  Any contract, anytime, anywhere in the world

Icertis, the leading enterprise contract management platform in the cloud, solves the hardest contract management problems on the easiest to use platform. With Icertis, companies accelerate their business by increasing contract velocity, protect against risk by ensuring regulatory and policy compliance, and optimize their commercial relationships by maximizing revenue and reducing costs. The AI-infused Icertis Contract Management (ICM) platform is used by companies like Airbus, Cognizant, Daimler, Microsoft and Sanofi to manage 6.5 million contracts in 40+ languages across 90+ countries.
