VANTAiO Enterprise TV Display

Frequent initial situation in companies - challenges

The range is insufficient and needs to be extended to new channels.

Important messages are scattered across the company's various digital and analog channels.

Editorial maintenance for different systems and channels is time-consuming and therefore the corridor radio is often faster.

Employees without fixed PC access are not or only difficult to reach, but should always be well informed.

The classic "news" understanding of the intranet is outdated. Employees feel much more information in the company as news.

Waiting times cannot currently be used to record information and read messages.

Messages can usually only be consumed via PC/notebook. TV display is not possible.

The employee expectation for the provision of information has increased significantly! You expect professional news. The frequency must rise!

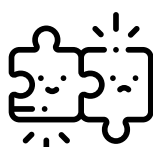

Messages must be captured multiple and redundantly for different output channels. This applies in particular to displays (digital signage).

VANTAiO Enterprise TV Display

Digital signage for corporate news – the solution!

The Enterprise TV Display is a web application designed for the attractive and prominent display of **internal and external** news as well as up-to-date information from the business on TV screens.

VANTAiO Enterprise TV Display

Digital Signage for Corporate News – the solution!

- Time-dependent output of selected news via fixed TV devices
- End-users have a read-only access
- Supplying the "broad mass" with news and business-relevant information
- Central maintenance of contributions and content for all output channels in a database. Additional maintenance costs for the output on TV sets are eliminated
- Employees or external stakeholders are also reached without PC access and provided with relevant news. Corporate news currently has a focus on digital formats and is mainly communicated via intranet & e-mail newsletter.
- Preview option

VANTAiO Enterprise TV Display

News are diverse - "What's New" from a user's point of view

HR / Personal

- › Personnel changes in the company
- › Internal vacancies
- › External job / position applications incl. advertising bonuses for employees (recommendations)
- › Changes in regulations or processes (travel costs, hourly registrations, applications... Focus: Simplifications)
- › Specialist training and further education opportunities
- › Change of responsibilities or contacts
- › Employees' anniversaries and birthdays
- › Information about new HR Self Services (e.g. applying for parental leave online)
- › employee programs such as severance payments, etc.
- › New personal messages available, such as payroll
- › Information on the holiday quota and related regulations
- › Benefits, pensions and company cars

Company

- › External press releases / also social media
- › Official corporate events and celebrations
- › New templates and general provisions

- › Regulations on special topics such as data protection
- › New sports and community offerings
- › Special bonuses/discount promotions for employees
- › Alumni Programs and News
- › New Sales / Applications (Black Board)

Products / Customers / Markets

- › About new customers
- › Special orders or large-scale projects
- › New product innovation or announcements
- › Special market developments or restrictions (e.g. Brexit)
- › New information materials

Office / Buildings / Supply / IT

- › Dining plans / canteen in particular special promotions
- › Temporary closures or diversions
- › General changes such as cleaning service
- › New infrastructure or software such as printers or virus software
- › Current alarms, safety and fire protection exercises

Board / Management

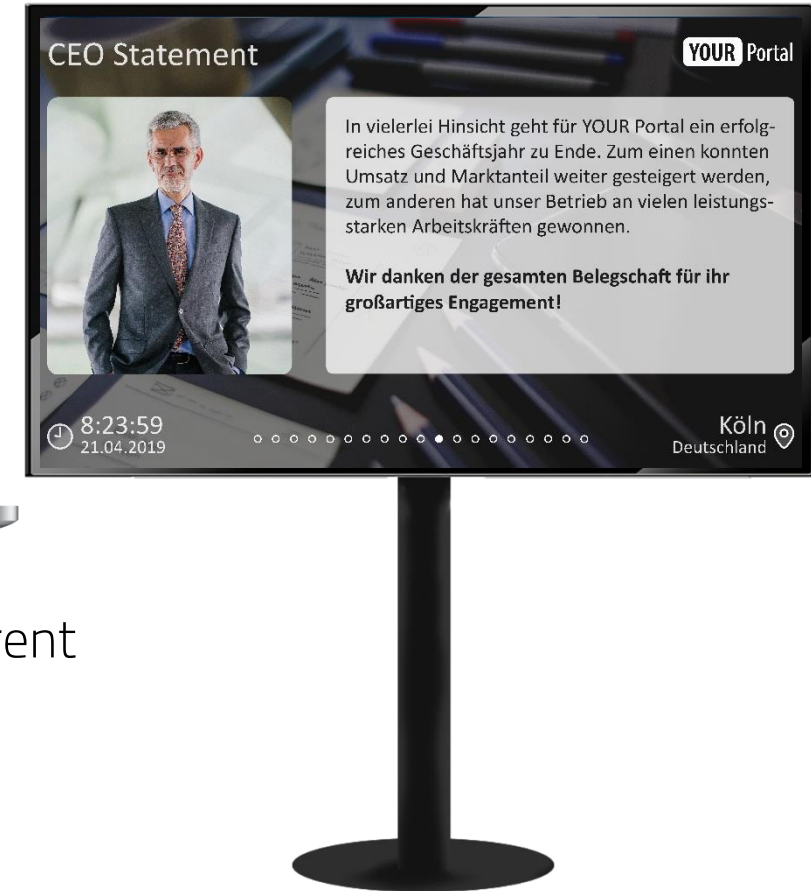

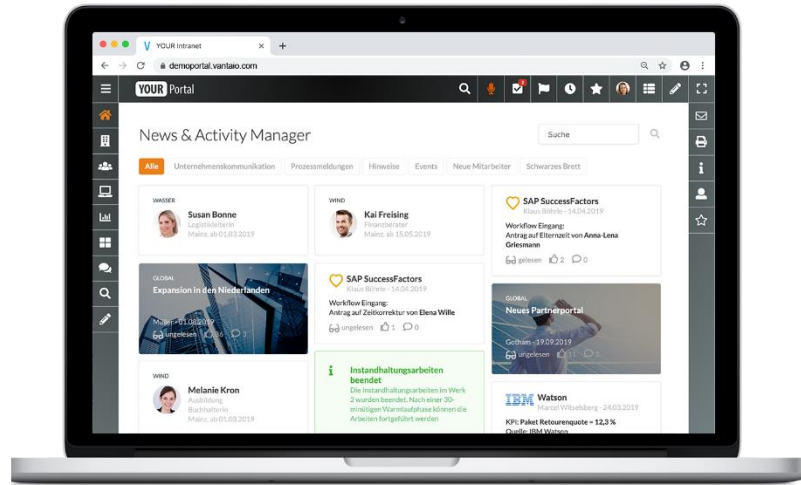

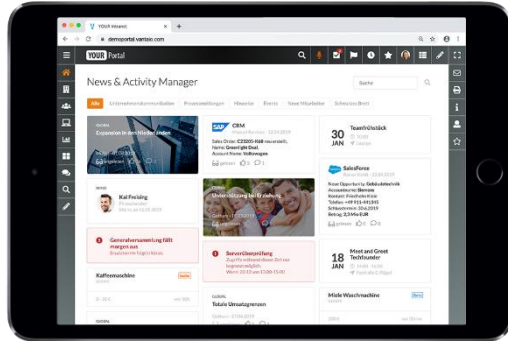

- › Innovations in corporate strategy
- › Acquisition or sales of companies
- › General market outlook
- › Balance Sheets and Company Reports
- › Regular progress report on special transformation programs ("Enterprise 2025")

Work area

- › Status change for internal orders
- › Exceeding thresholds or alerts
- › New legal changes
- › Procedural or process changes of higher-level bodies
- › Social Collaboration Streams, for example project rooms

VANTAiO Enterprise TV Display

Output devices are very different today

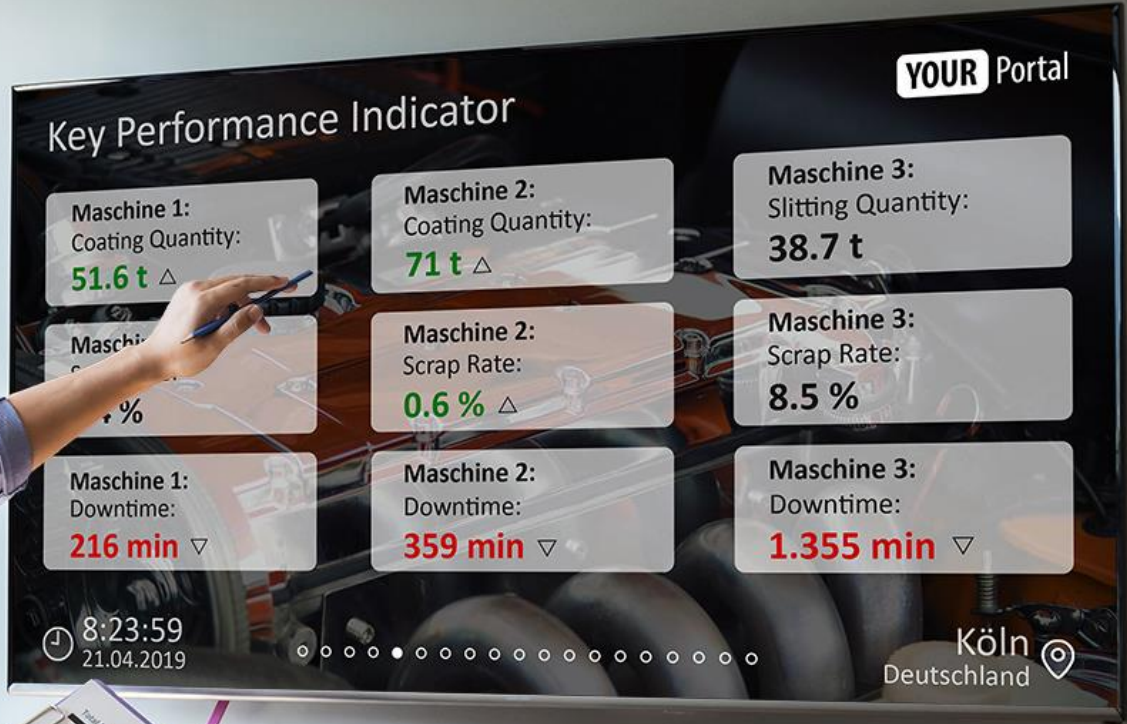

- Messages and information are retrieved on different devices in different places around the world.
- Output devices are very different today and data is often maintained redundantly, e.g. for PC, notebook, tablet, smartphone or TV.
- Objective: Central data acquisition and optimal reach with complete information without multiple maintenance.

TV Use Cases

Sandra Neuer learns via the VANTAiO TV display in the entrance area that her preferred company parking lot will be closed tomorrow and what alternative options are available to her.

Benjamin Frei informs himself about the current key performance indicators of production at the VANTAiO TV Display.

Leopold Graf and Helena Jakobs are waiting for the start of their meeting with the department management. During the waiting period, they discuss current key performance indicators from production.

The marketing team schedules a follow-up appointment and, thanks to the VANTAiO TV Display, keeps track of the times at all locations worldwide. At a glance, it is clear at what time the required contact persons are available.

Architecture

VANTAiO Enterprise TV Display Architecture

VANTAiO Enterprise TV Display

Modular design: instances and plugins

Instance Configurations - Global Configurations

Global settings can be made via the global instance configuration, e.g. CD/logo, duration of the animation, etc.

News Plugin

Configuration of the news source incl. filtering/selection according to meta data

Weather Plugin

Configuration of technical details (e.g. weather API key) and technical details (e.g. location of the weather, unit: Celsius vs. Fahrenheit)

ÖPNV Plugin

Configuration of technical details (e.g. RMV API key) and technical details (e.g. RMV stop, number of departures per stop)

World Clock Plugin

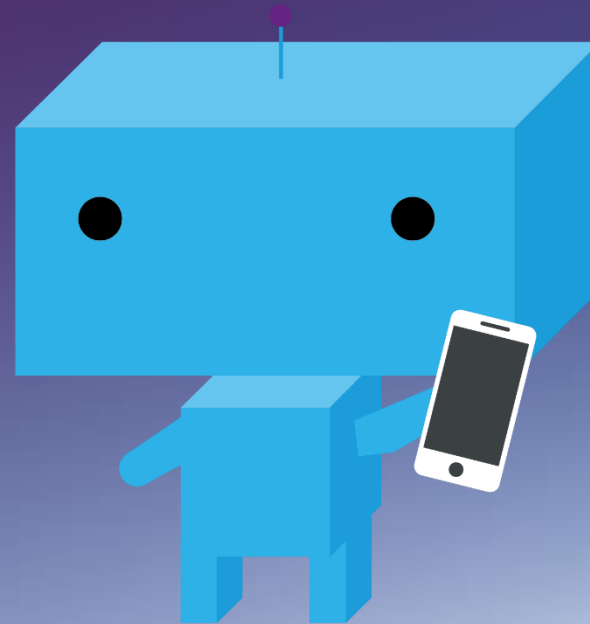

Configuration of cities/countries, time zones and, among other things, time format.

Custom Plugins

Individual customer requirements can be implemented via Custom Plugins.
