

Introduction

smart-integrated-design

Our Mission:

cAd
bIm
suPport
trAining
consuLting
smart • integrated • design

AIPAL strives to facilitate smart intelligent CAD design for all our clients. We recognise and seek to understand the impact of today's design and construction marketplace on those who create and document its future. In partnership with our clients, we make a deliberate positive change through the increase and diffusion of applicable knowledge, creativity, innovation, curiosity and product design. We are application engineers and specialists, technical consultants and designers. We are software engineers with a combined century of industry experience and understand your challenges and speak your language. We love the potential of the Construction and Engineering industries to change the world we

live in for the better. We love that through our combined support we can positively impact true and lasting efficient innovation for our clients and their clients. We love our families and want a better world for them, and we know that you do too.

Our Core Team:

Bikal has a Postgraduate Degree in Design and Architecture. He is an Architecture expert with over 7 years' experience across a variety of projects. He has a background in commercial and residential construction including small and large scale infrastructure. Bikal's expertise in Revit Architecture, AutoCAD, Revit Construction and Revit Structures creates a multi-disciplined approach to software support solutions.

Christian is an Engineer who has been working with various 2D and 3D software since 1997. He has been an expert in Autodesk BIM solutions for many years and has trained clients from Australia and around the world. Christian's vast experience includes Project and BIM Manager roles on large commercial and industrial projects. His software, training and support skills include AutoCAD, AutoCAD Architecture/MEP, Revit Architecture/MEP, Navisworks, BIM360 and many more.

Florian received Postgraduate Degrees in Business and Engineering with majors in Product Lifecycle Management (PLM) and Controlling in Germany. He offers 20 years of outstanding industry experience in Building Information Modelling (BIM) for multi-storey and warehouse buildings. Living in Australia, he is counted among the top BIM and simulation experts of the southern hemisphere and, as a result, enjoys speaking and teaching internationally.

Kent is an expert in Autodesk BIM Software, architectures, structures, MEP and CAD/BIM management. He has years of experience training clients from different backgrounds worldwide. He has developed many courses specifically for their individual or group needs. He enjoys producing content such as videos and training documentation both for general use and specific requests. Kent's vast experience includes structural drafting, contract administration, architectural technician, project management and BIM management roles on small and large residential, commercial and industrial projects.

What are your main and secondary products or workflows?

AutoCAD Electrical

AutoCAD MEP

3ds Max

AutoCAD

Licenses

AutoCAD Architecture

AutoCAD Mechanical

Revit

Revit Architecture

Revit MEP

Revit Structure

Revit Platform

AutoCAD Raster Design

FABmep

Plant3D

CADmep

ESTmep

Revit Coding

Civil3D

Robot Structural Analysis

Inventor FEA

Structural Bridge Design

Nastran in CAD

Advance Steel

Inventor Dynamic Simulation

Navisworks

Infraworks

Dynamo

Fusion 360

Eagle

BIM 360 Docs

BIM360 Design

BIM 360 Glue

BIM 360 Layout

BIM 360 Build

BIM 360 Ops

AutoCAD C# coding

Advance Steel C# or COM coding

Autodesk CFD

Autodesk and Python

Inventor VB.net

Generative Designs

Autodesk Addins

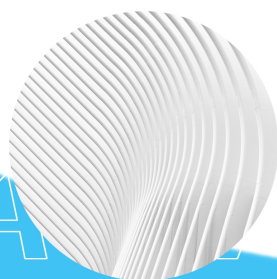

Unity3D and Reflect

Our Expertise:

- Support
- Onsite Training
- Remote Training
- Onsite Consulting
- Remote Consulting
- Product Sales
- BIM Management
- CAD Management
- Application Templates
- Content Service
- Modelling Service
- Rendering Service

We offer our service by the minute and yearly subscription.
