

Streamline your asset management and inventory tracking

Organizations strive to gain greater control and efficiencies when managing their assets - technology systems, office equipment, plant & machinery and people. Managing the complete life-cycle of assets, tracking their location to ensure assets are not missing or stolen, and ensuring upgrades and system deployments run effectively is a challenging process in many organizations. Using barcode scanning technologies to accomplish asset and inventory management is one of the easiest ways of simplifying this challenging process.

Built to integrate seamlessly with the SAP Fixed Asset module

- **Asset Physical Inventory Scheduler** report in SAP allows you to assign physical inventory tasks to your workforce.
- **Enable Push Notifications** from the SAP system to your employee's mobile device to notify them of upcoming tasks.
- **Realtime Integration** allows your workforce to update and manage asset information in real-time or offline.
- **Pre-built and SAP certified services with customizable field mapping** for barcode ID, location, department, maintenance, purchasing, warranty, lease, depreciation, information technology and other user defined fields.
- **Asset Master Data Cockpit** allows users to manage and accept asset master data changes initiated by a field device.
- **Asset Inventory Report** provides visibility to track asset physical inventory progress with audit results and metrics.

How does the mAssetTag solution work?

Your Asset Management team can use Innovapptive's Asset Tagging scheduler report, an SAP certified add-on to schedule physical asset inventory reconciliation by creating a batch of assets that requires a physical inventory reconciliation completed. The scheduler assigns this batch to a plant personnel and the system sends out a push notification to the assignee.

The plant personnel can review the batch of assets that are assigned to them and use the mAssetTag app's QR code or bar code scanner and GPS functionality to quickly complete the physical asset inventory reconciliation. In addition to that, if the plant personnel would like to create a new asset record, they can manually create the new asset record and print out a QR code or bar code right from the mobile app.

mAsset tag also comes with an Asset Management Cockpit for the central scheduling team to review and approve new asset requests and view status of completed items physically

Now you can check in, check out, locate, scan and track your assets – anytime, anywhere.

“Optimize asset visibility and utilization anytime - anywhere with the mAssetTag solution from Innovapptive”

Go Mobile in less than 4 weeks

Jump start your mobile journey in less than 4 weeks. Innovapptive offers a SAP Qualified Rapid Deployment Solution (RDS) for the mAssetTag mobile solution.

Business Benefits and Value Drivers

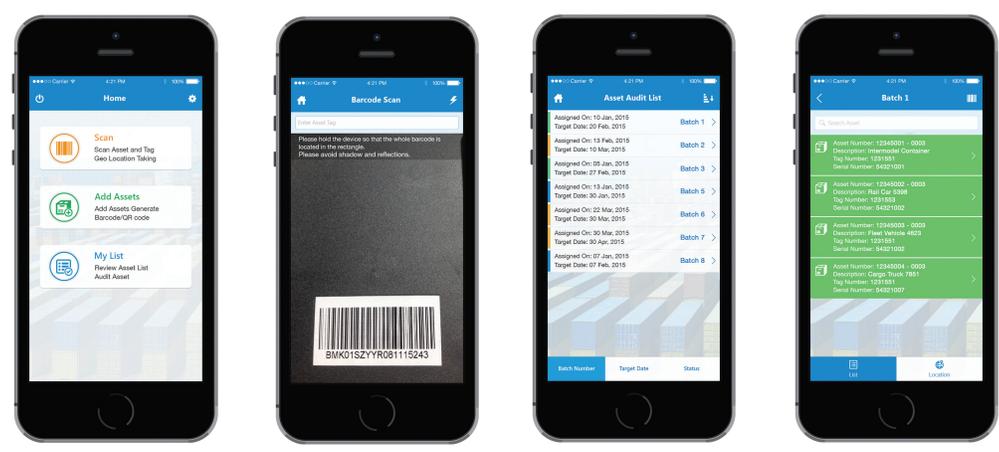

Scan, retrieve and update - It's that simple.

SAP is a powerful financial tool that can be combined with the full life cycle and tracking capabilities in mAssetTag. By seamlessly integrating SAP with a mobile device, this solution streamlines the management of all of your physical fixed assets, providing you with several tangible business benefits.

Business Benefits

- **Documentation and assurance** that the fixed assets you have on hand match your financial data.
- **Reduced federal tax liabilities** by writing off ghost assets.
- **Lowered personal property taxes** by retiring fixed assets that are no longer in use.
- **Reduced insurance premiums** by properly identifying and classifying assets and their conditions.
- **Reduced risk and potential losses** due to theft with quick and accurate audits

“Easy data collection using bar code technology streamlines the entry and management of fixed assets, reducing manpower and errors by eliminating duplicate entry of assets.”

Our Unique Value Proposition

Our Mobile Portfolio, innovative Rapid App Configurator Engine (RACE) powered by the SAP HANA Cloud Platform with embedded licenses allow our customers to accelerate and execute their SAP Enterprise mobile strategy, while benefiting from a compelling ROI.

Solution Environment

- SAP ECC 6.0, EHP any version
- On Premise - SAP Mobile Platform (SMP) 3.0
- Cloud - SAP HANA Cloud Platform
- SAP NetWeaver Gateway 7.3 & 7.4
- iPad, iPhones 6 or 6S & iOS 8.0 or 9.0.
- Android Smartphones and Tablets for most recent OS versions
- Windows Smartphones and Tablets for most recent OS versions
- Desktop Support on SAPUI5 and on SAP Fiori Launchpad

"Effective asset management is a mission-critical task for any company looking to avoid overpayment of taxes and insurance, reduce the total cost of ownership and comply with the latest regulatory mandates".

Awards & Recognition

Innovapptive featured among 135 leading enterprise mobile companies within the “Global Strategic Business Report Enterprise Mobility” published

INNOVAPPTIVE
innovate. transform. empower.

Innovapptive is among the fastest-growing enterprise mobile and user experience (UX) solution companies and is an industry leader among rapid mobile application development (RMAD) solution providers. Innovapptive’s Rapid App Configurator Engine (RACE) technology redefines traditional approaches to digitize the enterprise and is empowering organizations to rapidly deliver ready-to-run mobile apps across the enterprise. Innovapptive’s portfolio of 100+ mobile solutions that run across a wide array of devices and systems is creating a connected enterprise across employees, customers, and suppliers. Innovapptive was named a 2016 SAP Pinnacle Award winner and has won these recognition three years in a row.
