

## Module: **Proof of Delivery**

Streamline your delivery process using the new Proof of Delivery module, the latest addition to the Spindle Self Serve suite.

Developed to integrate with Spindle Self Serve, this module is designed for businesses who operate their own-fleet deliveries or service staff who require a signature. Includes Android mobile app for delivery drivers.

### Key benefits:

Easily manage own-fleet deliveries

Maximise efficiency of delivery fleet

Speed up obtaining, storing and retrieving proof of delivery

Have a clear record of delivery information with Sage 200cloud and Spindle Self Serve\*

Reduce risk of lost delivery notes and other paperwork

Improve customer service

### Key features:

Real-time monitoring (GPS) of delivery progress and location

'Sign-on-glass' signatures to replace paper delivery notes

Google Maps route optimisation

'Drag and drop' interface to allocate delivery drivers

Record delivery status, such as 'Could Not Deliver', and upload related images

View all delivery information within Spindle Self Serve

\*You will require Spindle Document Management to see the documents available in Sage200. If you have Spindle Self Serve only, they will stay in Spindle Self Serve
