T192621516: Invite First User to Company (MM creates new company) (User is not present on IDP)

Status	Type	Priority	Milestone
Untested	Other	4 - Must Test	None
References	Test Case Status	Automation Type	
CFR-1208, CFR-1209	In Progress	None	

Preconditions

IDP setup is present.

User with Marketplace manager role.

UUID: [input field]

Name: Cloud ID

Authentication Request Post URL: [input field]

Authentication Request Issuer: [input field]

Authentication Response Issuer: [input field]

Authentication Request Destination: [input field]

Force Authentication: Require users to re-authenticate with idP when marketplace session expires.

Account linking: Allow account linking to existing marketplace users based on their primary email address.

Automatic user creation: Automatically create a user account when a user logs in for the first time using the identity provider. For subsequent login, it will allow updating the user account.

Automatic company creation: Automatically create a company when a user logs in for the first time using the identity provider. If FALSE, company.ExternalId becomes a mandatory parameter in the payload and company existence check will be done. If this mandatory field is missing OR company does not exist, access denied error will be returned. If TRUE, system will JIT create a company unless a company.ExternalId is provided and refers to an existing company. For subsequent login, it will allow updating the company.

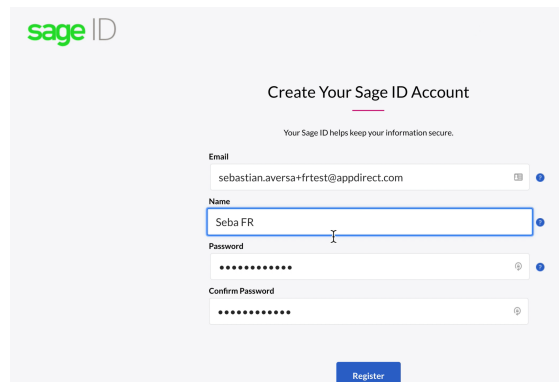

Update user roles: Update user roles through JIT.

Company Assignment: Automatically assign new self-registered users to existing companies by matching verified email domains.

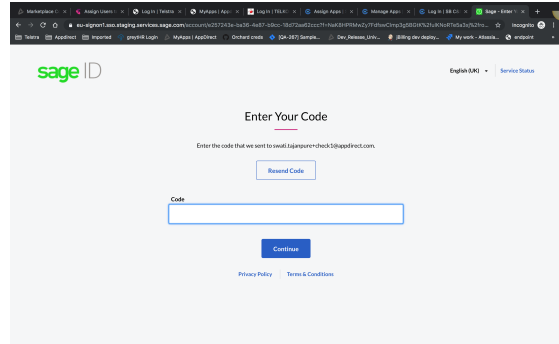

Step 5 depends on following setting:

Steps

Step	Expected Result
1 Login as Marketplace manager. Go to Dashboard -> Companies. Click on create company. Fill all essential info like user's email address(add verified domain) and click on create.	"Company successfully created" message get displayed on UI. User should receive an email with subject "Activate your new account."
2 Access email inbox as User and click on activation link	<ul style="list-style-type: none"> The user is redirected to Sage Cloud ID page The email filled in step 1 is prepopulated

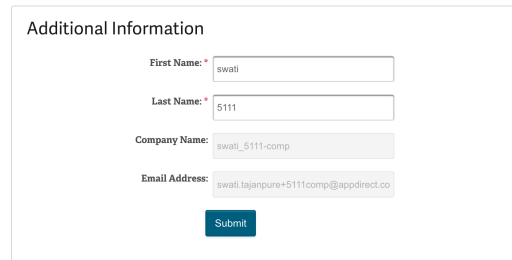

- 3 Enter Name, Password and Confirm password.
Click on register.

User get redirected to above page

- 4 Enter verification code received in email and click on continue.

User should get redirected to "Additional Details Page"
In this page: First name and Last Name are editable fields and pre-populated with the names from step 2
Company admin and Email address fields are greyed out with populated values from step 1

- 5 User can enter/edit First name , Last Name in additional details and submit.

User will logged in to marketplace as a member of the existing company

- 6 Repeat the above steps for non-verified domain
