

Petrochemical Production

Leading petrochemical producer in the USA

Customer challenges

- Execute projects faster
- Accommodate late project changes
- Minimize long cross-site cables
- Limited space / system footprint

Our Technology Partner

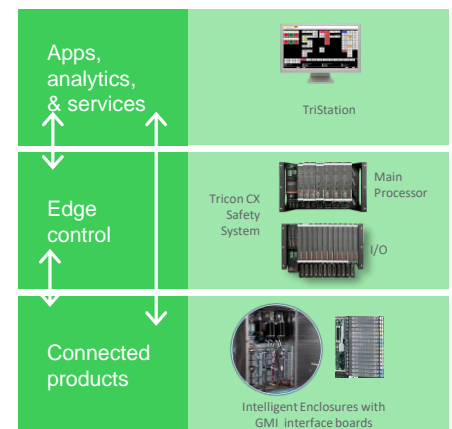

The solution

The safety system solution comprised of EcoStruxure Triconex Safety systems and Intelligent Enclosures distributed around the plant. Each enclosure contains Universal I/O and GMI interface boards:

- Configurable Universal I/O
- Adaptable field termination boards (pass through, safety relays, thermocouples, RTDs, Isolators, Intrinsic safety)
- Online I/O module replacement

EcoStruxure
Innovation At Every Level

The benefits

- Reduce system design, engineering and documentation
- Be shipped, installed and wired early for faster project execution and start-up
- Reduce field cabling and associated installation costs
