netcash

Payroll Outsourcing

20 years
of excellence

Payroll is now so much more convenient with Netcash integrated payments for salaries and wages.

8 Reasons to use Netcash for your salary payments.

1. **Our competitive fee structure will reduce your bank charges. Use our savings matrix on page 2 of this brochure to calculate your first years savings.**
2. Validate bank account numbers upfront to avoid last-minute rejected payments on pay day.
3. Bank account verification matches the bank account to your employee's ID number, so you pay the right employee every time.
4. To ensure that your account is more secure, you are able to dictate the levels of access, the number of authorisers per payment batch, and use One Time Pins (OTPs) or 2 Factor authentication to authorise payments.
5. Seamless file uploads to Netcash means no more emailing payment files. Email is often unsafe, unreliable, and exposed on the computer desktop.
6. Minimise human error and have the comfort that payment details can't be edited once the payments have been sent to Netcash.
7. You are able to do credit checks from multiple credit bureaus on employees on your Netcash account.
8. **Our Dated payment service ensures that all employees receive payment at the same time irrespective of where the bank account is held.**

Fee structure
