

Success-Stories

Ingentis org.manager is the leading software for the automated creation of organizational charts and visualization of key measurements. Today over 1000 customers worldwide trust in Ingentis org.manager. Learn about our customer projects with a focus on clear organizational structures combined with a lot of powerful features.

Maersk

The Danish business conglomerate visualizes with Ingentis org.manager personnel and organizational information on over 60,000 employees in 130 countries. Furthermore, a Data Quality Index is used, to show clean data. The quality index for organizational units is visualized via color coding (green, yellow, red) in the Ingentis org.manager. By an SAP implementation partner the software was brought to the attention of Maersk.

Vancouver Police Department

For the North American Police Department Ingentis provided insights and expertise at every move – the design, the data, the colors, and the possibilities for more. The response to the new electronic charts was overwhelmingly positive. Now everyone in the Department fully relies on the accuracy of the data they are reviewing, knowing it is up-to-date as well. The HR Team is trained in the basics of setting up data and to act as day-to-day editors.

Deutsche Telekom AG

Using Ingentis org.manager the European telecommunications provider is visualizing about 220,000 employees and 50 entities from 29 countries in an organizational chart via the Intranet. The software is also linked to the Telekom tool People@Telekom, an electronic directory. Ingentis org.manager creates transparency and is the basis for every organizational change as well as meetings and presentations.

Merck

Thanks to Ingentis org.manager the oldest pharmaceutical company in the world could reduce internal process costs and improve transparency. The seamless SAP integration and the easy-to-use approach made the difference in favor of Merck's purchase of Ingentis org.manager. Using Ingentis org.manager professional responsibilities across organizational charts and entities are visualized. On the Intranet organizational charts can be accessed across the company.

MANNHEIM²

City of Mannheim

In order to come closer to the goal of a management information system, the German city decided to adopt Ingentis org.manager. As a result, clearly organized personnel and organizational charts are provided. They extend from a simple organizational chart to reports on budget expenditures and demographic figures. All tables and diagrams can be exported directly from the reports and used in presentations as well as other documents.

Bavarian Insurance Chamber

Using Ingentis org.manager the insurance provider could speed up internal communication processes and enhance their quality. It is now possible to access roles and responsibilities for the entire staff of the company and to prepare them visually. The data are transferred automatically from the PeopleSoft system to Ingentis org.manager, which then proceeds to publish organizational charts on the Intranet.

REWE Group

Using Ingentis org.manager the retail and tourism corporation creates transparency in an organization with more than 270,000 employees. Due to the plug-and-play functionality the implementation of Ingentis org.manager did not take longer than a few hours. By using direct integration into the SAP system the efforts required for manual organizational chart creation are no longer necessary. Organizational chart publication is done via the REWE Group corporate Intranet using the corporate design guidelines.
