

A new Warehouse Management platform for

sage 300

A simple, powerful, and affordable automation tool to streamline your processes

Mobile sales and PO receiving

The Swiftcount app gives you the mobility and ability to create new sales or ship existing ones and receive purchase orders on the fly for quick and efficient data processing.

Better visibility

SwiftCount lets you see what you have and where it is, so that you never run out of inventory or miss out on sales again.

Adjust on the fly

Count, move, transfer, adjust, product... all from the app in seconds. Updates Sage 300 immediately and automatically.

Full audit trail

Traceability of your inventory is key. Track serial and lot items, access audit trails, pull out reports and manage access permissions.

Quick products overview

From the app, scan the product to check inventory status.

Produce and Assemble

From the app and the portal produce or receive finish goods and create the assemblies automatically in Sage.

Easily receive inventory

From the app, scan and receive products in (with or without Purchase Orders).

Advanced order management

Ship multiple orders at once by creating a wave and ship or receive from the portal.

Adjust inventory on the fly

From the app, scan and remove product quantities in or out of your inventory.

Curbside Pickup and In-House Delivery

Safely coordinate with your clients for safe delivery or pickup of their order via constant real time 2 way communication.

Fast stock taking

Use the app to count your inventory (extra speed with Auto-Scan feature).

Works on any iOS or Android devices

Use your phone or tablet with or without a Bluetooth scanner. Camera works well as well as any 1 or 2D scanners or industrial devices.

And then, there is **more...**

Same easy tool, just more possibilities

Multi-Warehouses

Manage all your inventory in one place, with multiple warehouses.

Full Variants management

Create and manage matrices of variant items with up to 3 levels and unlimited combinations. Allows mass edits and mass updates.

Multi Locations per warehouse

Know what you have and where it is in your warehouse or trucks

Serial & lot tracking

Manage and keep track of serialized products and lot numbers.

Transfers

Transfer product quantities between locations and warehouses, from the app.

Restock alerts

Whether you need to re-order or re-stock from the backroom, we will let you know.

Units of measure

You can manage the same product in boxes of 60, rolls of 30, cases of 10, or anything else.

Labels & Barcodes

Create and print labels with barcodes on any regular and thermal printers.

New complete sales management and creation modules for order entry

Syncs well with others

Integrate to Magento / Shopify / Lightspeed / QBO and many more
Sync orders created in your web store directly to Sage 300
