4asset

Powered by 4Sight

SIMPLICITY IS KEY

Fixed asset management is a simple and effortless process with 4asset.

4asset is a unique fixed asset management solution that manages the financial accounting, transactions and reporting relating to fixed assets. Physical fixed asset attributes and physical asset management are also addressed.

Designed from the ground up to be flexible, catering for customer business needs, conforming to industry and legislative requirements and delivering a valuable customer experience, makes 4asset the ideal solution for any industry.

4asset is ERP independent but has transactional integration points to connect to most ERP platforms to deliver an interactable solution.

Being browser-based means that 4asset can be accessed from any device with authorised access via the device browser.
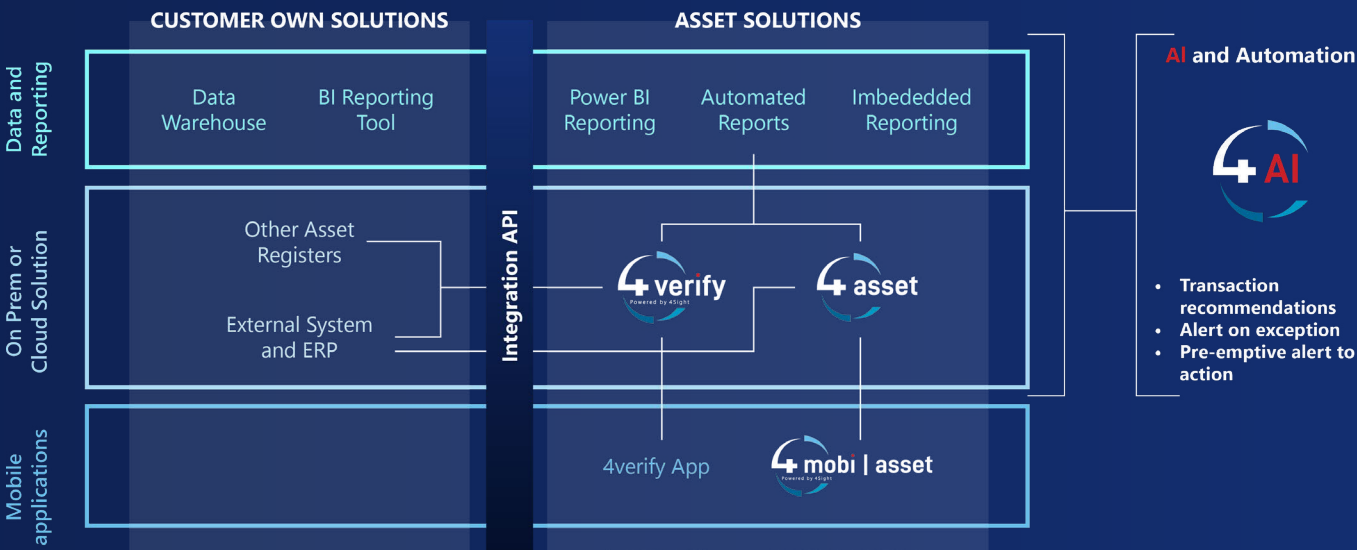

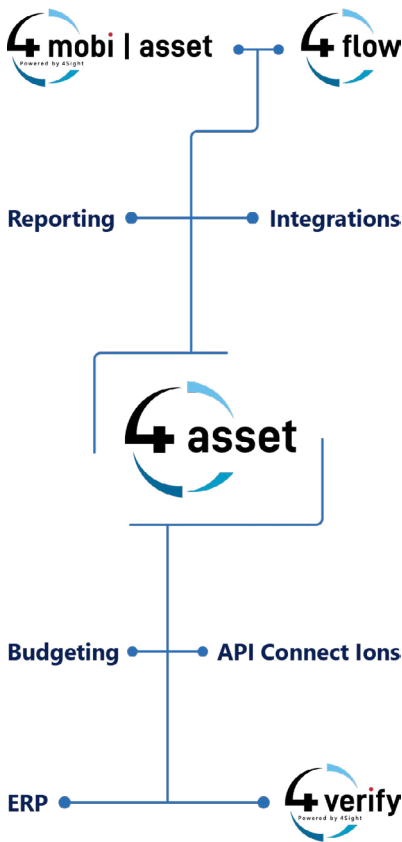

4asset is available for deployment on premise or online. It is as simple as accessing a URL and transacting on your own assets from anywhere.

Pre-built reports with customisation options allow for a robust out-of-the-box reporting experience, with the option to customise reports.

The mobile app, 4mobi | asset, enables employees to initiate transactions remotely with their phone.

Extending the standard functionality of 4asset with 4flow, enables a whole new aspect of automation, workflow approvals, customisation and integrations.

Linking 4asset with 4verify enables a full asset verification function, providing its own dashboard, access, mobile scanning and verification of fixed assets.

Feature	4 asset	4 mobi | flow	4 verify	4 AI

**BENEFITS AND DIFFERENTIATORS**

Integration to Modern Digital Enterprise

Using Microsoft technologies, the 4asset solutions are fully compatible with the Microsoft stack.

Agents and Copilots can be deployed to provide customers with insights into their assets data and makes customization for industry specific insights simple.

Configurable services are available to provide users with automated notifications for assets or insights into the total loss on capital due to early replacement.

Assets reaching end of life in the next 6 months

4MOBI | ASSET

4mobi | asset is a mobile application designed to increase productivity, enhance accessibility and streamline the fixed asset transaction processes.

A user can now initiate a transaction directly from their mobile, send it to the asset module, and have it updated directly in the fixed asset system.

Using the devices camera, it recognises a wide variety of barcodes, serial numbers, QR codes and then; effectively captures the asset information.

Transactions initiated from 4mobi | asset

Capitalisation

Add all capitalisation data

- Descriptions and identifiers. Barcodes, Serial number ect
- Categories
- Locations
- Cost centres
- Insurance and replacement values
- Cost
- Depreciation policy per ledger
